

Technical Notice **14-014**

TO: Montréal Exchange Participants & Vendors
FROM: Market Access Manager
SUBJECT: 3 New Equinix Datacenters – Migration
DATE: October 15, 2014

In response to customer feedback, the **Montréal Exchange (MX)** is pleased to announce the opening of 3 new datacenters on January 19, 2015. The new datacenters are located at **Equinix’s NY2**, 275 Hartz, Secaucus, NJ, **CH1**, 350 Cermak, Chicago, and **LD5**, 8 Buckingham Avenue Slough Trading Estate, London. This expansion will help MX continue to deliver great performance, encourage future growth and provide the best possible service for its customers.

The new datacenters will offer the same physical connectivity, market data access using MX’s HSVF protocol, trading access for quotes and orders using FIX and MX’s SAIL protocol and all other services offered at MX.

A notice will be sent in the coming weeks to announce further details on the implementation plan and schedule for customers, which involves migrating from the existing datacenters to the new datacenters. In the meantime, MX encourages customers to prepare for physical connectivity at the new datacenters and contact MX for further information.

MIGRATION TIMELINES

The Points of Presence (PoP) at NY10, 111 North Canal in Chicago and 6 Braham St. in London will remain connected for a period of 3 months following the go-live date of the new datacenter.

Following the migration, the 3 PoP’s will be decommissioned on April 27, 2015.
