

**TO:** Montréal Exchange (MX) Approved Participants  
**FROM:** Regulatory Division & Technical Help Desk  
**OBJECT:** Large Open Position Reporting (LOPR) Enhancement - Deadline Extension  
**DATE:** December 20<sup>th</sup>, 2017

---

Pursuant to technical notice 17-007, the Montréal Exchange (MX) Regulatory Division will be granting an extension to the original December 31st, 2017 deadline, which was the date until which all Large Open Position Reporting (LOPR) Position Report Manager (PRM) Graphical User Interface (GUI) users had to migrate their software versions from 1.7.1.0 to the new 12.26.5.1. SAIL LOPR Application Program Interface (API) protocol. Users also had until this date to migrate off of the A0 protocol and develop, test and certify towards the L2 protocol.

As such, the deadline has been extended to January 31st, 2018.

The goal of this cut-off date is to have all users migrated to the new version. Past this date, users will still be technically able to use the older version. However, should they experience any issues and reach out to the MX Technical Help Desk (THD), we will no longer provide any support for the older version and they will be forced to migrate to the new version as a solution to their problem. Therefore, any users choosing to continue using the older version past the cut-off date will be doing so at their own risk.

Please be sure to take all necessary requirements to have your version updated.

For any comments, concerns or questions, please contact the Technical Help Desk or the Regulatory Division (see below).
