### EXPANSION OF CO-LOCATION SERVICES

Bourse de Montréal Inc. will be expanding its co-location services to offer approved participants the opportunity to locate their trading applications in the TMX Group data centre. This move will offer significant advantages to approved participants seeking to reduce response times, increase their effectiveness and better serve their own customers as high frequency multi-asset class trading becomes an increasingly important component of capital markets activity.

Co-location provides clients with the lowest latency access to the TMX Group trading enterprise (including the Montréal Exchange, Toronto Stock Exchange and TSX Venture). Approved participants will be able to co-locate their trading systems with the MX SOLA<sup>®</sup> and TSX Quantum<sup>™</sup> trading engines, and TMX Datalinx market data products.

To meet the significantly-increased international demand and to accommodate the expanded co-location services, TMX Group entered into a new lease to increase the size of its facilities. Construction has begun to prepare the new space for targeted rollout beginning early in 2010; however, clients are already confirming interest. The new facility is designed to accommodate up to 200 co-location spaces, which will meet current and anticipated demand for the services.

**TMX Group will be performing initial allocation based on confirmed interest by November 2, 2009.**

For questions or comments, or to subscribe to co-location services, please contact Mark Bourcier, Participant Connectivity Coordinator, at 514 871-3581 or by e-mail at [samconnect@m-x.ca](mailto:samconnect@m-x.ca).
