**CIRCUIT BREAKER POLICY (T-3)
2008 FOURTH QUARTER LEVELS OF INTERVENTION**

As provided for in its Circuit Breaker Policy (T-3), Bourse de Montréal Inc. (the Bourse) has calculated for the next quarter the levels of intervention at which trading halts will occur following respective declines of 10%, 20% and 30% in the Dow Jones Industrial Average (DJIA) of the New York Stock Exchange (NYSE).

The Bourse, in coordination with the Toronto Stock Exchange (TSX) and the NYSE, will halt trading in its listed equity and index options and the S&P/TSX 60 index futures contracts and S&P/TSX capped sectorial index futures contracts as set forth in its Circuit Breaker Policy, after respective drops of:

After a 10% drop (1,100 points) of the DJIA

The market will be halted for: 1 hour if the drop of 10% occurs prior to 2:00 p.m.
30 minutes if the drop occurs between 2:00 p.m. and 2:30 p.m.

There will be no market halt if the drop occurs after 2:30 pm.

After a 20% drop (2,200 points) of the DJIA

The market will be halted for: 2 hours if the drop of 20% occurs prior to 1:00 p.m.
1 hour if the drop occurs between 1:00 p.m. and 2:00 p.m.

The market will close for the remainder of the day if the drop occurs after 2:00 pm.

After a 30% drop (3,350 points) of the DJIA

The market will close for the remainder of the day regardless of when the drop occurs.

During the fourth quarter, in the event that the Montréal Exchange is open on a trading day that the NYSE is not scheduled to be open for trading, trading halts will be triggered when the S&P/TSX Composite Index declines below its closing value on the previous trading day by:

10% (1,150 points)

20% (2,300 points)

30% (3,450 points)

Circulaire no : 161-2008

These levels will remain in effect until the next review which will take place in January 2009. This review will be done considering the December 2008 average daily closing level of the DJIA.
