Such process will automatically take place until trading on the instrument resumes. The Bourse can extend the trading halt created by the reserved state to ensure orderly trading.
 - iv) The Bourse will notify the market through its market data feed when an instrument enters into a reserved state and when trading is resumed for such instrument.
 - v) During the continuous trading phase, passive orders priced outside the Y limits but within the X limits will be allowed in the Trading System. - vi) A limit order priced outside the Y limits that could otherwise be partially executed will be partially executed up until a lot is priced outside of the Y limits, and the remaining quantity of the order will be priced at the Y limit.
3. Control prices and percentages of the X limits and Y limits can be modified and Y limits can be temporarily lifted at the Bourse's discretion to ensure regular trading.
4. The X limits are disseminated to the market via the Bourse's market data feed daily prior to the opening of the market.

6368 Trading Stages

~~(25.09.00, 24.09.01, 12.09.14, 02.10.17, 05.10.18)~~

The following is a list of trading stages:

- Pre-opening

2. The Bourse may subject Futures to the X limits and Y limits as follows:

a) X limits: any order entered by a participant in breach of the X limits is automatically rejected by the Trading System and a message is automatically sent to the participant to confirm such order rejection.

b) Y limits

i) At the opening of an instrument, a theoretical opening price under or above the calculated Y limits causes the Derivative Instrument to enter into a reserved state.

ii) Participants can enter new orders and modify or cancel their orders on an instrument which is in reserved state.

iii) When an instrument is in reserved state, the Trading System will attempt to automatically re-open the trading of such instrument through a volatility auction. Should the resulting reopening price be within the Y limits, trading on

the instrument will resume. Should the resulting reopening price be outside the Y limits, the instrument will be maintained in a reserved state and another volatility auction will take place. Such process will automatically take place until trading on the instrument resumes. The Bourse can extend the trading halt created by the reserved state to ensure orderly trading.

- iv) The Bourse will notify the market through its market data feed when an instrument enters into a reserved state and when trading is resumed for such instrument.
- v) During the continuous trading phase, passive orders priced outside the Y limits but within the X limits will be allowed in the trading system. Should the potential execution price of an incoming order be outside the Y limits, such incoming order will be eliminated, preventing the trade, and a message will be automatically sent to the participant to confirm such order elimination.
- vi) A limit order priced outside the Y limits that could otherwise be partially executed will be partially executed up until a lot is priced outside of the Y limits, and the remaining quantity of the order will be priced at the Y limit.

3. Control prices and percentages of the X limits and Y limits can be modified and Y limits can be temporarily lifted at the Bourse's discretion to ensure regular trading.

4. The X limits are disseminated to the market via the Bourse's market data feed daily prior to the opening of the market.

5. The X limits do not apply to bulk quotes entered by Approved Participants or clients of Approved Participants while acting as duly appointed Market Makers pursuant to Article 3.112.

Article 6.102C Maximum Price Variation Thresholds

Article 6.108 Trade Matching and Order Priorities

- (a) Pre-opening, pre-closing and Intra-session Auctions. During the pre-opening stage and the pre-closing stages of the Trading Day, and during the pre-auction stage of an intra-session auction period, orders are entered but no Trades are generated until the end of the stage. The Electronic Trading System will calculate the opening price, the closing price or the auction price, as the case may be, using the Calculated Theoretical-Opening price methodology (CTO).
- (i) The CTO price represents the overlapping bid/ask price range that results in the maximum possible Trade volume. When there is more than one possible CTO at which the maximum volume is reached, the price with the lowest residual is used. Furthermore under the following conditions:
- (1) if there is an imbalance on the buy side, the highest price is taken;
 - (2) if there is an imbalance on the sell side, the lowest price is taken; and
 - (3) where the residuals are the same, the price which is closest to the previous Settlement Price is taken.
- (ii) Stop limit orders do not enter into the CTO calculation.
- (b) Market session (continuous trading). The Electronic Trading System allocates the tradeable orders first on a price basis, and then on a first in, first out basis (FIFO), except when part of the allocation is subject to an execution guarantee as defined by the Bourse. Stop limit orders in the Electronic Trading System shall be presented to the market as soon as their triggering limit is reached.

Article 6.109 Orders

- (a) ~~1-~~To be considered valid, an order must specify the name or symbol of the Listed Product, whether it is a buy or sell order, the quantity of ~~units~~the order, explicit instructions regarding the trading price and the conditions which must be met prior to the order becoming effective, and the type and duration qualifier of the order.
- (b) ~~2-~~The types of ~~orders~~ which ~~can be~~ entered into the ~~electronic trading system~~Electronic Trading System are as follows:

A ~~Market~~market order is executed at the best limit that is available on the other side of the market at the moment the order is introduced into the ~~electronic trading system~~Electronic Trading System, at the quantity available at this limit. If the order is partially filled, the unfilled quantity becomes a limit order at the price the first part of the order was executed.

- (1) ~~ii)~~ A ~~Market~~ market order can only be entered during the ~~Market-Session~~ market session (Continuous Trading); ~~and~~.
- (2) ~~iii)~~ A Market order is only accepted by the system if a price limit exists on the other side.
- (ii) ~~b)~~ Limit order ~~An~~. A limit order is an order to buy or sell at a specified price, or better.
- (iii) ~~e)~~ Stop limit order ~~i) An~~. A stop limit order is order to buy or sell which becomes a limit order once the contract has traded at the stop-price or higher in the case of a buy order; at the stop-price or lower in the case of a sell order.
- (1) ~~ii)~~ If more than one stop order has the same trigger price, then the first in, first out basis (FIFO) rule will apply. Once the stop order becomes a limit order, a new time priority is given to it.
- (2) ~~iii)~~ Stop limit orders can only be entered as day orders.
- (iv) ~~d)~~ Opening / Closing / closing price order (~~Market on Open and Market on Close~~) ~~i) An~~ market-on-open and market-on-close. - (1) ~~ii)~~ If an opening price order is not filled in full, the order is assigned the opening price Calculated Theoretical-Opening (CTO) as defined in ~~article 6375 of the Rules~~, Article 6.109 as its new limit.
- (v) ~~e)~~ Hidden quantity order ~~An~~. A hidden quantity order ~~that~~ enables a ~~trader~~ Trader to hide a certain quantity of the order to the market by displaying to the market only that portion of the total order which has been initially parameterized by the user to be seen by the market. The hidden quantity, which is the remainder of the order, is seen only by the Bourse. When the order is executed for the disclosed quantity, it is renewed for the same disclosed quantity but positioned at the end of the queue at the same limit. It loops until the whole order quantity (total quantity) has been filled.
- (vi) ~~f)~~ Committed order ~~An~~. A committed order is an order that can only be matched with another opposite committed order that meet the following conditions:

6374 **Management of Order Priorities** ~~(25.09.00, 24.09.01, 29.10.01)~~

The management of orders' priorities is made on the basis of the chronology of their receipt. The orders initiated for the ~~firm account of approved participants~~ Firm Account of Approved Participants must be made on an order ticket at the same conditions as those for client orders. In all cases, each ~~approved participant~~ Approved Participant is responsible for insuring that, at the same price and time stamp, it gives priority to client orders over its own professional orders, unless the client has expressly waived the priority of his order and that such waiver is documented by the ~~approved participant~~ Approved Participant.

6375 **Order Priority** ~~(25.09.00, 29.10.01, abr. 29.10.01)~~

6375 **Allocation of tradeable orders** ~~(25.09.00, 24.09.01, 29.10.01, 22.01.16, 02.10.17, 17.01.18, 05.10.18)~~

~~a) Pre-opening, Pre-closing and Intra-session Auctions~~

~~During the pre-opening stage and the pre-closing stage of the Trading Day, and during the pre-auction stage of an intra-session auction period, orders are entered but no trades are generated until the end of the stage. The electronic trading system will calculate the opening price, the closing price or the auction price, as the case may be, using the Calculated Theoretical Opening price methodology (CTO).~~

~~The CTO price represents the overlapping bid/ask price range that results in the maximum possible trade volume.~~

~~When there is more than one possible CTO at which the maximum volume is reached, the price with the lowest residual is used. Furthermore under the following conditions:-~~

- ~~- if there is an imbalance on the buy side, the highest price is taken;~~
- ~~- if there is an imbalance on the sell side, the lowest price is taken; and~~
- ~~- where the residuals are the same, the price which is closest to the previous settlement is taken.~~

~~Stop limit orders do not enter into the CTO calculation.~~

~~b)- Market Session (Continuous Trading)~~

~~The electronic trading system allocates the tradeable orders first on a price basis, and then on a first in, first out basis (FIFO) except when part of the allocation is subject to an execution guarantee as defined by the Bourse. Stop limit orders in the electronic trading system shall be presented to the market as soon as their triggering limit is reached.~~

In addition, if the order is for the account of an insider or of a significant shareholder, as these terms are defined in Article 6.115, it must be identified as such. When these conditions are met, the system automatically records the order. A BTC is a Trade effected on the Bourse on a Futures Contract designated by the Bourse that is priced in reference to the closing price of the applicable Underlying Interest, adjusted by a valid price increment (the “basis”). A BTC may result in a final Futures Contract

price to be outside of applicable daily price limits. The final Futures Contract price will be calculated as follows: Underlying Interest closing price + basis (the basis could be either positive or negative). The Underlying Interest closing price will be the last price published by the Toronto Stock Exchange (“TSX”) at the calculation time on a given day. If no price is available, the Underlying Interest closing price published by TSX on the previous day will be used. Should the Underlying Interest closing price be modified after the calculation time, but before 5:00pm, the final Futures Contract price will be automatically adjusted by the Electronic Trading System on the same trading day. Should the Underlying Interest closing price change after 5:00pm, the final Futures Contract price will be adjusted the following trading day. The calculation time may differ from one Futures Contract to another. In the event of a disruption in the primary market for a given Underlying Interest, a trading halt will be invoked on the BTC by a Market Supervisor. The Bourse will publish by circular the trading schedule, calculation time and minimum price fluctuation for each futures contract for which the BTC is offered. The BTC trading schedule may be different from the related Futures Contract trading schedule. However, the last day of Trading of the BTC shall be the same as the last trading day of the related Futures Contract

Chapter C—Prearranged Transactions and Trade Cancellation

Article 6.200 Non-Trading System Transfers of Existing Futures Contracts

- (a) Notwithstanding Article 6.3, off-exchange transfers of open Futures Contracts may be accomplished only if there is no change in the beneficial ownership of the Futures Contracts, the Approved Participants involved in the transfer are able to

produce to the Bourse upon request, all orders, records and memoranda pertaining thereto and the transfer either:

- (i) is made at the request of the beneficial owner of the Futures Contracts from one Approved Participant to another; or
 - (ii) is made at the request of one Approved Participant to another Approved Participant; or
 - (iii) is made to correct an error in clearing; or
 - (iv) is made to correct an error in the recording of Transactions in the Approved Participant's books.
- (b) Both Approved Participants which are parties to an off-exchange transfer pursuant to this Article shall complete and submit to the designated Clearing Corporation such information evidencing the terms of the off-exchange transfer as may be prescribed by the Clearing Corporation on the day on which such transfer is effected.
- (c) Notwithstanding the provisions of paragraph (a), a transfer of a position either on the books of an Approved Participant, or from one Approved Participant to another, may be permitted at the discretion of the Bourse if the transfer:
- (i) is in connection with, or results from, a merger, asset purchase, consolidation or similar non-recurring transaction between two or more entities; or
 - (ii) involves a Partnership, investment fund, or commodity pool and the purpose of the transfer is to facilitate a restructuring or consolidation of such Partnership, investment fund, or pool, provided that the managing partner or pool operator remains the same, the transfer does not result in the liquidation of any Open Positions, and the pro rata allocation of interests in the consolidating account does not result in more than a *de minimis* change in the value of the interest of any party; or
 - (iii) is in the best interests of the market and the situation so requires.

Article 6.201 Average Price Transactions

- (a) Approved Participants, at the request of a client, may accumulate a Futures position in an inventory account and transfer this position to the Client Account at an average price. - (b) The Bourse requires that confirmations to clients of average price Trades must indicate that the Transaction price is an average price. The Approved Participant

must be able to provide clients with full details of the execution of the Transaction in a timely manner.

- (c) If an Approved Participant has a firm time-stamped client order and accumulates Futures in an inventory account for administrative purposes only, the transfer of the position to the client must be done over-the-counter (OTC). This procedure is required to ensure that the unwinding does not represent a change in beneficial interest (i.e., the client is the beneficial owner of the Futures in the inventory account at all times). However, if an Approved Participant accumulates a position based on an indication of interest from the client, the transfer of the position to the Client Account must result in a Transaction on the Electronic Trading System of the Bourse.
- (d) The date used on the client's confirmation shall be the date of the unwinding, provided that the client requested an average price. Approved Participants must, however, maintain records of each individual Trade and of the transfer, which must be available to both the client and regulatory authorities on request.

Where a block strategy transaction involves the trading of inter-group strategy instruments (excluding futures/options combinations), each derivative leg of the strategy needs to meet its applicable minimum volume threshold.

Where a block strategy transaction involves the trading of futures/options combinations strategy instruments, the applicable minimum volume thresholds are defined in the last two rows of the table above.

(iv) ~~iv~~)-Approved Participants may not aggregate separate orders in order to meet the minimum volume thresholds.

- ~~(v)~~ ~~v)~~ Each party to a block trade must be an accredited counterparty as defined in section 3 of the ~~Quebec~~ *Derivatives Act*, CQLR c I-14.01.
 - ~~(vi)~~ ~~vi)~~ The price at which a block trade is arranged must be “fair and reasonable” in light of (a) the size of the block trade; (b) currently traded prices and bid and ask prices in the same ~~derivative instrument~~ Derivative Instrument; (c) the underlying markets; and (d) general market conditions, all at the relevant time. The fairness and reasonableness of the price of a block trade priced at a basis to an ~~index~~ Index as permitted under paragraph ~~2(b)~~ of this ~~article~~ Article may also take into account the following additional considerations: (e) financing rates, (f) expected dividend income, and (g) time remaining until the ~~index-futures-contract~~ Index Futures Contract expiration, all at the relevant time. Although there is no requirement for a block trade to be executed within the daily high and low prices, execution outside of that price range may result in a request by the Regulatory Division for additional information about the ~~transaction~~ Transaction.
 - ~~(vii)~~ ~~vii)~~ Block trades shall not trigger special terms orders or otherwise affect orders on the ~~electronic trading system~~ Electronic Trading System.
 - ~~(viii)~~ ~~viii)~~ A block trade on a contract roll strategy is not permitted, except for the FTSE Emerging Markets Index ~~futures-contract~~ Futures Contract.
 - ~~(ix)~~ ~~ix)~~ The details of a block trade must be reported by Approved Participants for both the buyer and seller to the Market Operations Department by telephone at 1-888-696-6366 or at 514-871-7871 and on a Block Trade Reporting Form, available on the Bourse’s web site at <https://sttrf-frots.m-x.ca>, within the time prescribed in ~~6380d-6.206 (a) (ii)~~.
 - ~~(x)~~ ~~x)~~ Following validation of the ~~trade~~ Trade details by the Bourse (which is not a confirmation by the Bourse that the block trade has been effected in accordance with this Article), the Bourse shall disseminate the ~~trade~~ Trade and price information relating to the block trade.

Article 6.205 ~~6380e~~-Riskless Basis Cross -Trades

- (a) ~~1)~~ In general. An Approved Participant and the customer may prearrange a ~~transaction~~Transaction outside of the ~~electronic trading system~~Electronic Trading System in which the price of a stock ~~index futures contract or a share futures contract~~Index Futures Contract or a Share Futures Contract to the customer is determined to be the average price of cash market transactions entered into by and for the account of the Approved Participant in the components of the ~~underlying index~~Underlying Index or the underlying ~~security~~Security, respectively, plus a spread (basis) as mutually agreed between the Approved Participant and the customer, in accordance with the following conditions:

- (i) ~~a)~~ Each party to a riskless basis cross ~~transaction~~Transaction must be an accredited counterparty as defined in section 3 of the ~~Quebec~~ *Derivatives Act*, CQLR c I-14.01.
- (ii) ~~b)~~ The parties may agree to either a fixed basis or to a guaranteed execution price of the cash component with the basis adjusted accordingly.

- (iii) ~~e)~~ To initiate the riskless basis cross ~~transaction~~Transaction, the Approved Participant for its own account must first acquire positions (long or short exposure) in ~~securities~~Securities, baskets of ~~securities, index participation units~~Securities, Index Participation Units, or exchange-traded funds which, for an ~~index~~Index, comprise no less than 80% of the underlying components of the applicable ~~index~~Index and being reasonably correlated to the ~~underlying index~~Underlying Index with a correlation coefficient (R) of 90% or greater, calculated using any generally accepted methodology. Although Approved Participants generally should purchase or sell all of the components of the index, an Approved Participant need not obtain any component security due to restrictions on the purchase or sale of the commodity by the Approved Participant or the customer, the unavailability of the component in the market due to a trading halt, illiquidity or other market conditions.
- (iv) ~~d)~~ The ~~transaction~~Transaction shall be executed at the time agreed by the counterparties, which must be during the regular trading hours of the ~~underlying—index~~Underlying Index components or ~~underlying interest~~Underlying Interest until the end of the extended trading session at the Toronto Stock Exchange (TSX) and the same day that the cash position is completed by the Approved Participant, provided however, if obtaining the cash components of the ~~underlying index~~Underlying Index cannot be completed in a single day, execution of the futures portion of the ~~transaction~~Transaction shall be proportionate with the proportion of the cash market transactions completed during that day.
- (v) ~~e)~~ The riskless basis cross ~~transaction~~Transaction is executed by the Approved Participant reporting details of the ~~transaction~~Transaction to the Market Operations Department on a “Special Terms Transaction Reporting Form” through the Bourse’s web page at <http://sttrf-frots.m-x.ca>, and allocating the agreed upon quantity of stock ~~index futures contracts~~Index Futures Contracts to the customer’s account.
- (vi) ~~f)~~ There is no minimum size requirement to enter into a riskless basis cross ~~transaction~~Transaction nor is there any time period following execution of the riskless basis cross ~~transaction~~Transaction that the Approved Participant must maintain the cash market position.
- (vii) ~~g)~~ The price at which the futures contract leg of the ~~transaction~~Transaction is arranged must be “fair and reasonable” in light of (i) the size of the ~~transaction~~Transaction (ii) traded prices and bid and ask prices in the same contract (iii) the volatility and liquidity of the relevant market and (iv) general market conditions all at the relevant time. Although there is no requirement for the ~~futures contract~~Futures Contract leg of a riskless basis cross ~~transaction~~Transaction to be executed within the daily high and low prices, execution outside of that price range may result in a request by the

Regulatory Division for additional information about the ~~transaction~~Transaction.

- (b) ~~h)~~ Each party to a riskless basis cross ~~transaction~~Transaction must keep full and complete records relating to the riskless basis cross ~~transaction~~Transaction and must provide to the Bourse upon request complete records and documentary evidence relating to such ~~transaction~~Transaction demonstrating that the ~~transaction~~Transaction is a *bona fide* ~~transaction~~Transaction and that it has been carried out in accordance with the conditions of this ~~article~~Article.
- (c) ~~i)~~ The Bourse shall exclude riskless basis cross ~~transactions~~Transactions from the daily ~~settlement-price~~Settlement Price procedures but not from daily volume figures. A record of each riskless basis cross shall appear in the “Transaction Report” maintained on the Bourse’s Web page http://www.m-x.ca/dailycrosses_en.php following it being registered by the Market Operations Department in the ~~trading system~~Trading System and shall be specially marked and displayed in the systems (trading platform and data vendors) in the Bourse’s post ~~trade~~Trade recap.
- (d) ~~j)~~ In all circumstances, a riskless basis cross ~~transaction~~Transaction can only be arranged by the Approved Participant’s Approved Persons.

~~6380f. Trading Against Customer Orders (Cross-Trades).~~

~~An Approved Participant may not knowingly, directly or indirectly, take the opposite side of a customer order for the Approved Participant’s own account, an account in which the Approved Participant has a direct or indirect financial interest or an account over which the Approved Participant has discretionary trading authority, unless:~~

- ~~a) the customer order has first been entered on the electronic trading system and exposed to the market for a minimum period of 5 seconds for futures and options; or~~

Article 6.206 Exchange of Futures for Related Products

- (a) EFRP Transactions in general. Exchanges for Related Product (“EFRP”)
Transactions involving Futures Contracts listed and traded on the Bourse are permitted if such Transactions are executed in accordance with the requirements of this Article. An EFRP Transaction is composed of the privately negotiated execution of a Bourse Futures Contract and the opposite, simultaneous execution

of an approximately equivalent quantity or value of cash product, by-product, related product, or Over-The-Counter (“OTC”) Derivative Instrument underlying the Futures Contract.

- (i) An EFRP Transaction is permitted to be executed off of the Bourse’s Trading System pursuant to Article 6.204 if such Transaction is conducted in accordance with each of the requirements and conditions of this Article.
- (ii) The following separate types of Transactions are referred to collectively as EFRP Transaction under this Article, and are included under, and subject to, its provisions:

 - (1) Exchange for Physical (“EFP”) – the simultaneous execution of a Bourse Futures Contract and a corresponding cash market transaction; and
 - (2) Exchange for Risk (“EFR”) – the simultaneous execution of a Bourse Futures Contract and a corresponding OTC swap or other OTC derivative transaction.
- (iii) Each party to an EFRP Transaction must be an accredited counterparty as defined in section 3 of the *Derivatives Act* COLR c I-14.01.
- (iv) The accounts involved on each side of an EFRP Transaction must:

 - (1) have different beneficial ownership;
 - (2) have the same beneficial ownership, but are under separate control;
 - (3) have accounts that are commonly controlled, but involve separate legal entities which may or may not have the same beneficial ownership; or
 - (4) when the parties to an EFRP Transaction involve the same legal entity, same beneficial ownership, or separate legal entities under common control, the parties must be able to demonstrate that the exchange Transaction was a legitimate arms-length Transaction.
- (v) The cash market instrument leg of the EFRP Transaction must provide for, and result in, the transfer of ownership of the cash market instrument within the time customary in the applicable cash market or in OTC practice. If the seller does not have actual possession of the cash market or OTC Derivative Instrument before execution of the EFRP, the seller must be able to demonstrate an ability to satisfy the Delivery requirement.

(vi) With regard to the Futures leg of an EFRP, if the minimum price fluctuation of Transactions in the Futures Contract vary by strategy or otherwise, such as variation in the minimum price fluctuation for equity Index Futures Contracts between outright and calendar spread Transactions, the minimum price fluctuation of the EFRP Futures component shall be the lowest minimum price fluctuation provided for in the Rules with regard to the Futures Contract.

(vii) The Approved Participants involved in an EFRP, upon request by the Bourse, must be able to demonstrate that:

(1) the related Futures and cash or OTC position are reasonably correlated, with a correlation of R=0.70 or greater, calculated using any generally accepted methodology, for all EFRP Transactions except as otherwise specifically provided, each such correlation based on daily price data for a period of at least six (6) months or weekly price data for a period of at least one (1) year; and

(2) the quantity or value of the cash or OTC component of the EFRP Transaction must be approximately equivalent to the quantity or value of the Futures Contract.

(viii) The price at which an EFRP Transaction is arranged must be “fair and reasonable” in light of (w) the size of the Transaction; (x) currently traded prices and bid and ask prices in the same contract (y) the underlying markets; and (z) general market conditions, all at the relevant time. Although there is no requirement for an EFRP to be executed within the daily high and low prices, execution outside of that price range may result in a request by the Regulatory Division for additional information about the Transaction.

(ix) It is prohibited to effect an EFRP Transaction for the purpose of reporting, registering or recording a non-bona fide price or entering into a Transaction which is a “wash sale,” an accommodation trade or a fictitious sale.

(x) Neither party to an EFRP Transaction may enter into the Transaction to circumvent the contract month roll in the corresponding Security or Derivative Instrument.

(b) EFPs. EFP Transactions on the following Futures Contracts and the related physical or cash instrument are recognized by the Bourse:

(d) Reporting EFRP Transactions. Approved Participants for both the seller and buyer must report within one hour upon determination of all the relevant terms of the Transaction to the Market Operations Department on the Special Terms Transaction Reporting Form available at <http://sttrf-frots.m-x.ca/> each EFRP Transaction executed during the trading hours of the applicable Futures Contract. For those EFRP Transactions executed after such trading hours, the Transaction shall be reported to the Bourse no later than 10:00 a.m. (Montréal time) on the Trading Day following execution. The Market Operations Department will validate the details of the report before accepting the Transaction (which is not a confirmation by the Bourse that the EFRP Transaction has been effected in accordance with this Article).

(e) Books and records of EFRP Transactions. Each party to an EFRP Transaction must maintain full and complete records and documentary evidence relating to the EFRP, including but not limited to all records relating to the purchase or sale of the cash market or OTC derivative component of the Transaction and to any transfer of funds or ownership made in connection with such Transaction. Such records include, but are not limited to, documentation customarily generated in accordance with market practice, such as cash account statements, Trade

confirmation statements, ISDA® Master Agreements or other documents of title; third party documentation supporting proof of payment or transfer of title, such as canceled checks, bank statements; cash account statements and cash instruments Clearing Corporation documents. In addition, Futures Contracts order tickets (which must clearly indicate the time of execution of the EFRP Transaction) must be maintained. Records related to the Transaction must be provided to the Bourse upon request and it is the responsibility of the Approved Participant to obtain and provide on a timely basis records of their clients as requested by the Bourse.

- (f) In all circumstances, an EFRP Transaction can only be arranged by the Approved Participant's Approved Persons.

Article 6.207 Validation, Alteration or Cancellation of a Trade

If certain urgent events require it or if certain extraordinary market conditions exist, and in order to maintain a fair and equitable market for all participants, a Market Supervisor can validate, alter, disallow or cancel any Trade and such Trade will be validated, altered, disallowed or cancelled. These decisions are final and cannot be appealed. In the case of a cancellation, the Trade will have no standing whatsoever and shall be expunged from the records.

Article 6.208 Trade Cancellation and or Price Adjustment

- (a) ~~a)~~ In General. The Bourse may adjust ~~trade~~Trade prices or cancel ~~trades~~Trades when such action is necessary to mitigate market disrupting events caused by the improper or erroneous use of the ~~trading-system~~Trading System. Notwithstanding any other provision of this ~~article~~Article, the Bourse may adjust ~~trade~~Trade prices or cancel any ~~trade~~Trade executed through the ~~trading-system~~Trading System if the Bourse determines in its sole discretion that allowing the ~~trade~~Trade to stand as executed may have a material, adverse effect on the integrity of the market or the market's orderly operation. The decision of the Bourse in such matters shall be final.
- (b) ~~b)~~ Review of Trades, Requests for Review. The Bourse may review a ~~trade~~Trade or ~~trades~~Trades based upon its analysis of market conditions, including but not limited to market volatility, prices in related markets, or in response to a request for review of a specific ~~trade~~Trade by an Approved Participant. An Approved Participant must request review of a ~~trade~~Trade by calling the Market Operations Department of the Bourse at 514 871-7871 or 1-888-693-6366 within 15 minutes of execution; *provided however*, the Bourse, in its sole discretion, may extend the period in which an Approved Participant may request review of a trade up to one hour following execution in extraordinary circumstances.
- (i) ~~e)~~ Notice to the Parties to the Transaction. Where the Bourse on its own analysis determines to review a ~~trade~~Trade or ~~trades~~Trades for adjustment or cancellation, or where an Approved Participant has requested review of a specific ~~trade~~Trade and that ~~trade~~Trade is outside of the No Review Range provided under paragraph g) of this ~~article~~Article, the Bourse will

notify the parties to the ~~trade~~Trade that the ~~trade~~Trade or ~~trades~~Trades are under review by the Bourse.

(ii) ~~d)~~ Price Adjustments and Cancellations Procedures. Upon making a determination to review a ~~trade~~Trade, the Bourse shall, (1) determine, in its sole discretion, the acceptable marker price, and (2) apply the increments provided under paragraph g) in order to determine the limits of the No Review Range.

(c) ~~i)~~ Trade Price Inside the No-Review Range. If the Bourse determines that the ~~trade~~Trade price is inside the No Review Range, the Bourse will notify the two Approved Participant counterparties to the ~~trade~~Trade that the ~~trade~~Trade shall stand as executed; *provided however*, the Bourse may cancel such a ~~trade~~Trade within 15 minutes of the ~~trade~~Trade's execution and within the trading session during which the ~~trade~~Trade was executed (early, regular or extended), if both Approved Participant counterparties to the ~~trade~~Trade voluntarily consent to cancellation of the ~~trade~~Trade.

(d) ~~ii)~~ Trade Price Outside the No -Review Range. If the Bourse determines that the ~~trade~~Trade price is outside of the No-Review Range, the Bourse, after endeavoring to contact the Approved Participant counterparties, shall adjust the price to the limit of the No Review Range. The policy of the Bourse is to favor price adjustment as a remedy over ~~trade~~Trade cancellation and to adjust ~~trades~~Trades in order to minimize the impact for all market participants involved in the erroneous ~~trades~~Trades and particularly those who had a regular order in the order book. However, the Bourse, in its discretion, may cancel a ~~trade~~Trade rather than adjust the price if:

(i) ~~A)~~ Bothboth parties to the ~~trade~~Trade can be contacted within a reasonable delay and agree to the cancellation of the ~~trade~~Trade; and

(ii) ~~B)~~ Neitherneither party to the ~~trade~~Trade is either an Approved Participant or the registered holder of a SAM ID.

(e) ~~iii)~~ Implied Orders, Implied Strategy Orders.

~~A)~~ An order generated by the implied pricing algorithm (using regular orders) and registered in the order book by the ~~electronic trading system~~Electronic Trading System will be considered by the Bourse as though it were a regular order entered into the ~~trading system~~Trading System by an Approved Participant.

(i) ~~B)~~ An implied or regular strategy trade is considered by the Bourse, as being composed of two regular orders, one for each leg of the strategy ~~trade~~Trade. If the erroneous ~~trade~~Trade involves a linked implied order(s) and is priced outside the No Review Range, the initiator of the original

error ~~trade~~Trade will be responsible for the ~~trade~~Trade resulting from the linked implied order(s).

(ii) ~~e~~) The adjustment relating to an erroneous strategy ~~trade~~Trade will equal at least the increment between the No Review Range and the traded price on one of the individual legs, and no more than the sum of each individual legs' increments.

~~6636.2 Daily Price Limits on Options
(02.03.18)~~

~~For the purpose of this article:~~

- ~~a) "control price" means a price calculated for each options using a generalized version of the Barone Adesi model for American style options and Black Scholes model for European style options.~~
- ~~b) "X limits" means price limits based on a percentage of the control price under and above which an order is not allowed to register in the central limit order book.~~

- e) ~~“Y limits” means price limits based on a percentage of the control price under and above which an incoming order would not be executed and would be eliminated, or under and above which a theoretical opening price would put the derivative instrument into a reserved state.~~
- d) ~~“reserved state” means a trading halt triggered by a theoretical opening price under or above the Y limits at the opening of a given instrument.~~

~~The Bourse may subject options to the X limits and Y limits as follows:~~

- a) ~~X limits: any order entered by a participant in breach of the X limits is automatically rejected by the trading system and a message is automatically sent to the participant to confirm such order rejection.~~
- b) ~~Y limits~~
 - i) ~~At the opening of an instrument, a theoretical opening price under or above the calculated Y limits causes the derivative instrument to enter into a reserved state.~~
 - ii) ~~Participants can enter new orders and modify or cancel their orders on an instrument which is in reserved state.~~
 - iii) ~~When an instrument is in reserved state, the trading system will attempt to automatically re-open the trading of such instrument through a volatility auction. Should the resulting reopening price be within the Y limits, trading on the instrument will resume. Should the resulting reopening price be outside the Y limits, the instrument will be maintained in a reserved state and another volatility auction will take place. Such process will automatically take place until trading on the instrument resumes. The Bourse can extend the trading halt created by the reserved state to ensure orderly trading.~~
 - iv) ~~The Bourse will notify the market through its market data feed when an instrument enters into a reserved state and when trading is resumed for such instrument.~~
 - v) ~~During the continuous trading phase, passive orders priced outside the Y limits but within the X limits will be allowed in the trading system. Should the potential execution price of an incoming order be outside the Y limits, such incoming order will be eliminated, preventing the trade, and a message will be automatically sent to the participant to confirm such order elimination.~~
 - vi) ~~A limit order priced outside the Y limits that could otherwise be partially executed will be partially executed up until a lot is priced outside of the Y limits, and the remaining quantity of the order will be priced at the Y limit.~~

~~Control prices and percentages of the X limits and Y limits can be modified and Y limits can be temporarily lifted at the Bourse’s discretion to ensure regular trading.~~

~~The X limits are disseminated to the market via the Bourse’s market data feed daily prior to the opening of the market.~~

~~The X limits do not apply to bulk quotes entered by approved participants or clients of approved participants while acting as duly appointed market makers pursuant to article 6395.~~

6637 Expiration Date

b) ~~In the case of equity options, exchange traded fund options, index options and currency options other than weekly options, the expiration date shall be the third Friday of the contract month, provided it is a business day. If it is not a business day, the expiration date shall be the preceding business day.~~

Appendix 6A—Procedures Applicable to the Execution of Strategies Involving Futures and Options on Futures

Appendix 6A-1 OBJECTIVE

The objective of these procedures is to provide for and facilitate the trading of strategies involving Futures Contracts and Options on Futures Contracts from the same product group, i.e., contracts with the same underlying (“Intra-Group Strategies”) as well as from different product groups, i.e., contracts with different underlyings (“Inter-Group Strategies”). Strategies involving Futures Contracts and Options contracts on such Futures Contracts are Inter-Group Strategies. Approved Participants may create user-defined Intra-Group or Inter-Group Strategies (each, a “UDS”) via individual trading terminals which allow for customized strategies to be disseminated and traded. When not feasible, an Approved Participant must contact the Bourse Market Operations Department at 1-888-693-6366 or 514-871-7871 for assistance in creating a UDS.

Appendix 6A-2 DESCRIPTION

(a) Creation by Approved Participant.

An Approved Participant requests the creation of a UDS instrument by sending a message to the Bourse’s Trading System through any of the protocols supported by the Bourse. This message contains the parameters of the strategy the Approved Participant wishes to display.

Bourse will determine from time to time the strategy types that will be accepted by the UDS functionality, and will notify the market of such acceptance criteria.

The UDS functionality will validate that the strategy created is among those that are accepted by the Trading System. If accepted, the newly created strategy instrument will be broadcast in real time to the market via Bourse’s High Speed Vendor Feed, similar to the broadcast of any instrument. If the strategy is not accepted by the UDS functionality, an error message will be returned to the Approved Participant submitting the message.

A throttling mechanism is engaged in order to limit the number of strategy instruments created by an Approved Participant. Each Approved Participant is configured by Market Operations Department with a maximum number of instrument creation requests per Trading Day. Bourse will determine that maximum number depending on the capacity of its systems and will notify the market of such number. If the counter falls to zero, the Approved Participant is not able to create any new strategy instrument on that day. Conversely, the counter is credited if a newly created strategy instrument generates at least one Trade during that Trading Day.

(b) Creation by the Market Operations Department.

If a strategy cannot be created using the UDS facility because it is not accepted by the Bourse’s trading system, the Approved Participant may contact the Market Operations

Department and request the creation of the UDS. The UDS must conform to the acceptance criteria as determined by the Bourse from time to time.

The UDS functionality will validate that the strategy created is among those that are accepted by the Trading System. If accepted, the newly created strategy instrument will be broadcast to the market via the Bourse's High Speed Vendor Feed, similar to the broadcast of any instrument.

In such cases, the Market Operations Department's assistance is limited to creating the UDS. Approved Participants are responsible for entering orders.

Appendix 6B—Procedures Applicable to the Execution of Strategies Involving Options

Appendix 6B-1 OBJECTIVE

The objective of these procedures is to provide and facilitate the trading of strategies involving equity Options for Approved Participants. For the purposes of these procedures, equity Options also include Options on Indices, currencies and exchange-traded funds. Approved Participants may create user-defined strategies (“UDS”) via individual trading terminals which allow customized strategies to be disseminated and traded. When not feasible, an Approved Participant must contact the Bourse’s Market Operations Department at 1-866-576-8836 or 514-871-7877 for assistance in creating or executing a UDS when applicable.

Appendix 6B-2 DESCRIPTION

(a) Creation by Approved Participant.

An Approved Participant requests the creation of a UDS instrument by sending a message to the Bourse’s Trading System through any of the protocols supported by the Bourse. This message contains the parameters of the strategy the Approved Participant wishes to display.

Bourse will determine from time to time the strategy types that will be accepted by the UDS functionality, and will notify the market of such acceptance criteria.

The UDS functionality will validate that the strategy created is among those that are accepted by the Trading System. If accepted, the newly created strategy instrument will be broadcast to the market via Bourse’s High Speed Vendor Feed (“HSVF”) and the Order Book Feed (“OBF”), similar to the broadcast of any instrument. If the strategy is not accepted by the UDS functionality, an error message will be returned to the Approved Participant submitting the message.

A throttling mechanism is engaged in order to limit the number of strategy instruments created by an Approved Participant. Each Approved Participant is configured by the Market Operations Department with a maximum number of instrument creation requests per Trading Day. The Bourse will determine that maximum number depending on the capacity of its systems and will notify the market of such number. If the counter falls to zero, the Approved Participant is not able to create any new strategy instrument on that day. Conversely, the counter is credited if a newly created strategy instrument generates at least one Trade during that Trading Day.

(b) Creation by the Market Operations Department.

If a strategy cannot be created using the UDS facility because it is not accepted by the Bourse’s trading system, the Approved Participant may contact the Market Operations Department and request the creation of the UDS. The information provided by the Approved Participants to the Market Operations Department must include the option series involved and the quantity ratio.

If accepted, the newly created strategy instrument will be broadcast to the market via the Bourse's High Speed Vendor Feed (HSVF) and the Order Book Feed (OBF), similar to the broadcast of any instrument.

In such cases, the Market Operations Department's assistance is limited to creating the UDS. Approved Participants are responsible for entering and executing the orders.

(c) Execution by Market Operations Department.

All option strategies must be executed using the Bourse's UDS facility. Notwithstanding the aforementioned, if a strategy cannot be created and broadcasted using the UDS because the strategy type is not supported by the UDS facility, or because one of the strategy legs is the **underlying share**, the Approved Participant may submit to the Bourse a strategy order for execution using the following procedure:

- (i) The Approved Participant must contact the Market Operations Department and indicate its Option strategy. The information provided must include the Option series involved, the quantity ratio, the price and the total quantity of the order. Approved Participants must have received and time-registered their order prior to contacting the Market Operations Department. If the intended strategy includes an equity leg, the Approved Participant must also indicate the reference price of the Underlying Interest and the number of shares to be executed in the strategy.
- (ii) The Market Operations Department will contact qualifying Market Makers assigned to the Option class. A qualifying Market Maker is defined as a Market Maker that is showing a bid/ask market no wider than the no-bust range of that instrument, with a minimum of 10 contracts per side. The Market Operations Department will respect the following procedure:
 - (1) For strategies involving less than 50 contracts per leg, Market Makers will be contacted individually based on the Market Maker quoting the tightest market on the Options legs comprising the strategy;
 - (2) For strategies involving between 50 and 99 contracts per leg, Market Makers will be contacted by groups of two, according to their rank on their quotes;
 - (3) For strategies involving 100 contracts or more per leg, all qualifying Market Makers quoting on the Option legs of the strategy will be contacted;

In the event that a strategy is comprised of multiple legs, the Market Operations Department will take into account the Option with the furthest expiry to determine which participating Market Makers will be contacted. Qualifying Market Makers will be contacted and shown the strategy as submitted by the Approved Participant. If the Market

Maker(s) accepts the prices provided by the Market Operations Department, the Transaction will be entered and broadcast to all relevant parties (Approved Participants, Market Makers, and stock exchange, if necessary).

(iii) The Market Makers may provide responding bids, offers and quantities:

(1) If Market Makers choose to participate on the strategy, they must be willing to Trade all parts inherent to the Transaction (all series, shares) but they will not be obligated to Trade the entire quantity; and

(2) If a particular Market Maker is not available within 15 seconds of the Market Supervisor of the Market Operations Department initiating the telephone call, no additional attempts to contact him will be made. The Market Maker should provide an answer to the Market Operations Department within approximately 30 seconds of the strategy description given by the Market Operations Department. Allowance will be made for a longer response time in the case of a particularly complex strategy. If all attempts fail the order will be rejected.

(iv) In some situations where the strategy cannot be executed, the Market Operations Department may inform the Approved Participant of the best corresponding bid/offer as well as the corresponding quantities obtained by Market Makers. Once the details of the Transaction are negotiated and confirmed, information on the Transaction will be entered into the Bourse's Trading System by the Market Operations Department and broadcast to the marketplace. The strategy Trade will be broadcast via the Bourse's Web site and the leg prices and volumes will be disseminated via the Bourse's data feed. If the Transaction includes an equity leg and the Option leg has been executed, the Market Operations Department will submit the equity portion of the strategy to the venue where the equity is traded.

(d) Execution of Cross Transaction on Strategies Involving Options.

(i) Cross Transactions with a 50% Guaranteed minimum will not be accepted electronically. Please refer to Article 6.205.

(ii) Cross Transactions on equity Options strategies without a 50% Guaranteed minimum will be accepted electronically. Please refer to Article 6.202.

(Approved Participants, Market Makers, and stock exchange, if necessary).

(iii) The Market Makers may provide responding bids, offers and quantities:

(1) If Market Makers choose to participate on the strategy, they must be willing to Trade all parts inherent to the Transaction (both share Futures and Underlying Interests) but they will not be obligated to Trade the entire quantity; and

(2) If a particular Market Maker is not available within 15 seconds of the Market Supervisor of the Market Operations Department initiating the telephone call, no additional attempts to contact him will be made. The Market Maker should provide an answer to the Market Operations Department within approximately 30 seconds of the strategy description given by the Market Operations Department.

(b) In some situations where the strategy cannot be executed, the Market Operations Department may inform the Approved Participant of the best corresponding bid/offer as well as the corresponding quantities obtained by Market Makers. (~~08.09.89, 17.10.91, 05.01.94, 19.01.95, 01.05.95, 07.09.99, 31.01.01, 03.05.04, 21.04.08, 17.04.09, 12.02.16, 17.01.18, 15.06.18, 11.07.18, 14.09.18, 05.10.18~~)

~~1) EFRP transactions in general. Exchanges for Related Product (“EFRP”) transactions involving futures contracts listed and traded on the Bourse are permitted if such transactions are executed in accordance with the requirements of this article. An EFRP transaction is composed of the privately negotiated execution of a Bourse futures contract and the opposite, simultaneous execution of an approximately equivalent quantity or value of cash product, by product, related product, or over the counter (“OTC”) derivative instrument underlying the futures contract.~~

~~a) An EFRP transaction is permitted to be executed off of the Bourse’s trading system pursuant to article 6380b if such transaction is conducted in accordance with each of the requirements and conditions of this article.~~

~~b) The following separate types of transactions are referred to collectively as EFRP transaction under this article, and are included under, and subject to, its provisions:~~

~~i) Exchange for Physical (“EFP”)—the simultaneous execution of a Bourse futures contract and a corresponding spot or forward transaction.~~

~~ii) Exchange for Risk (“EFR”)—the simultaneous execution of a Bourse futures contract and a corresponding OTC swap or other OTC derivative transaction.~~

~~c) Each party to an EFRP transaction must be an accredited counterparty as defined in section 3 of the Quebec Derivatives Act, CQLR c I-14.01.~~

~~d) The accounts involved on each side of an EFRP transaction must:~~

~~i) have different beneficial ownership;~~

~~ii) have the same beneficial ownership, but are under separate control;~~

~~iii) have accounts that are commonly controlled, but involve separate legal entities which may or may not have the same beneficial ownership; or~~

~~(iv) when the parties to an EFRP transaction involve the same legal entity, same beneficial ownership, or separate legal entities under common control, the parties must be able to demonstrate that the exchange transaction was a legitimate arms length transaction.~~

- e) The cash market instrument leg of the EFRP ~~transaction~~ must provide for, and result in, the transfer of ownership of the cash market instrument within the time customary in the applicable cash market or in OTC practice. If the seller does not have actual possession of the cash market or OTC ~~derivative instrument~~ before execution of the EFRP, the seller must be able to demonstrate an ability to satisfy the ~~delivery requirement~~.
- f) ~~With regard to the futures leg of an EFRP, if the minimum price fluctuation of transactions in the futures contract vary by strategy or otherwise, such as variation in the minimum price fluctuation for equity index futures contracts between outright and calendar spread transactions, the minimum price fluctuation of the EFRP futures component shall be the lowest minimum price fluctuation provided for in the Rules with regard to the futures contract.~~
- g) The Approved Participants involved in an EFRP, upon request by the Bourse, must be able to demonstrate that:
- i) ~~the related futures and cash or OTC position are reasonably correlated, with a correlation of R=0.70 or greater, calculated using any generally accepted methodology, for all EFRP transactions except as otherwise specifically provided, each such correlation based on daily price data for a period of at least six (6) months or weekly price data for a period of at least one (1) year; and~~
 - ii) ~~the quantity or value of the cash or OTC component of the EFRP transaction must be approximately equivalent to the quantity or value of the futures contract.~~
- h) The price at which an EFRP ~~transaction~~ is arranged must be “fair and reasonable” in light of (i) ~~the size of the transaction;~~ (ii) currently traded prices and bid and ask prices in the same contract (iii) the underlying markets; and (iv) general market conditions, all at the relevant time. Although there is no requirement for an EFRP to be executed within the daily high and low prices, execution outside of that price range may result in a request by the Regulatory Division for additional information about the ~~transaction~~.
- i) ~~It is prohibited to effect an EFRP transaction for the purpose of reporting, registering or recording a non-bona fide price or entering into a transaction which is a “wash sale”, an accommodation trade or a fictitious sale.~~
- j) ~~Neither party to an EFRP transaction may enter into the transaction to circumvent the contract month roll in the corresponding security or derivative instrument.~~
- k) ~~**Reporting EFRP transactions.** Approved Participants for both the seller and buyer must report within one hour upon determination of all the relevant terms of the transaction to the Market Operations Department on the Special Terms Transaction Reporting Form available at <http://sttrf.frots.m-x.ca/> each EFRP transaction executed during the trading hours of the applicable futures contract. For those EFRP transactions executed after such trading hours, the transaction shall be reported to the Bourse no later than 10:00 a.m. (Montréal time) on the Trading Day following execution. The Market Operations Department will validate the details of the report before accepting the transaction (which is not a confirmation by the Bourse that the EFRP transaction has been effected in accordance with this article).~~
- l) ~~**Books and records.** Each party to an EFRP transaction must maintain full and complete records and documentary evidence relating to the EFRP, including but not limited to all records relating to the purchase or sale of the cash market or OTC derivative component of the transaction and to any transfer of funds or ownership made in connection with such transaction. Such records include, but~~

are not limited to, documentation customarily generated in accordance with market practice, such as cash account statements, trade confirmation statements, ISDA® Master Agreements or other documents of title; third party documentation supporting proof of payment or transfer of title, such as canceled checks, bank statements; cash account statements and cash instruments clearing corporation documents. In addition, futures contracts order tickets (which must clearly indicate the time of execution of the EFRP transaction) must be maintained. Records related to the transaction must be provided to the Bourse upon request and it is the responsibility of the Approved Participant to obtain and provide on a timely basis records of their clients as requested by the Bourse.

m) In all circumstances, an EFRP transaction can only be arranged by the Approved Participant's Approved Persons.

(30.05.08, 12.02.16, abr.17.01.18)

6816 Off-Exchange Transfers of Existing Futures Contracts
(08.09.89, 07.09.99, 22.01.16, 17.01.18)

- a) ~~Notwithstanding article 6380, off exchange transfers of open futures contracts may be accomplished only if there is no change in the beneficial ownership of the futures contracts, the Approved Participants involved in the transfer are able to produce to the Bourse upon request, all orders, records and memoranda pertaining thereto and the transfer either~~
- ~~i) is made at the request of the beneficial owner of the futures contracts from one Approved Participant to another; or~~
 - ~~ii) is made at the request of a Approved Participant to another Approved Participant; or~~
 - ~~iii) is made to correct an error in clearing; or~~
 - ~~iv) is made to correct an error in the recording of transactions in the Approved Participants' books.~~
- b) ~~Both Approved Participants which are parties to an off exchange transfer pursuant to this article shall complete and submit to the designated Clearing Corporation such information evidencing the terms of the off exchange transfer as may be prescribed by the Clearing Corporation on the day on which such transfer is effected.~~
- c) ~~Notwithstanding the provisions of paragraph (a), a transfer of a position either on the books of an Approved Participant, or from one Approved Participant to another, may be permitted at the discretion of the Bourse if the transfer:~~
- ~~i) is in connection with, or results from, a merger, asset purchase, consolidation or similar non-recurring transaction between two or more entities; or~~
 - ~~ii) involves a partnership, investment fund, or commodity pool and the purpose of the transfer is to facilitate a restructuring or consolidation of such partnership, investment fund, or pool, provided that the managing partner or pool operator remains the same, the transfer does not result in the liquidation of any open positions, and the pro-rata allocation of interests in the consolidating account does not result in more than a de minimis change in the value of the interest of any party; or~~
 - ~~iii) is in the best interests of the markets and the situation so requires.~~

6817 Treatment of Long and Short Positions
(07.10.93, 03.01.95, 07.09.99, 14.09.18)

- a) ~~Unless concurrent long and short futures positions in the same contract month are held on behalf of i) an omnibus account; or ii) in accordance with the provisions of paragraph e) of this rule, a clearing member shall not be permitted to maintain with the Clearing Corporation such positions for i) a single account; or ii) accounts under common control and ownership. It is the duty of the clearing member to ascertain that such positions are permitted to be concurrently long and short.~~
- b) ~~A clearing member shall promptly close out a customer's open long or short position held with the Clearing Corporation if an offsetting purchase or sale is made for such customer's account.~~
- c) ~~A clearing member would be permitted to carry with the Clearing Corporation concurrent long and short positions for separate accounts of a customer, provided that:~~
- ~~i) each person directing trading for one of the separate accounts is unaffiliated with and acts independently from each other person directing trading for a separate account;~~

- ~~ii) each trading decision made for each separate account is determined independently of all trading decisions made for the other separate account or accounts; and~~
- ~~iii) no position held in accordance with the above sub-paragraphs i) and ii) may be offset by transfer, adjustment, or any other bookkeeping procedures. Each position must be offset by transactions made on the electronic trading system of the Bourse.~~
- ~~d) Although article 6816 allows for off-exchange transfers of futures contracts, a clearing member shall not be permitted to knowingly allow such transfers when, as a result, concurrent long and short positions would be held contrary to this rule. The positions which would create the concurrent long and short situation may not be so transferred, but must remain with the original clearing member, be transferred elsewhere, or liquidated by transactions made on the electronic trading system of the Bourse.~~

6818 ~~Average Price Trades~~
(20.03.00, 14.09.18)

~~Approved Participants, at the request of a client, may accumulate a futures position in an inventory account and transfer this position to the client account at an average price. This may only be done if the Approved Participant has a firm time stamped order from the client before accumulating the position.~~

~~The Bourse requires that confirmations to clients of average price trades must indicate that the transaction price is an average price. The Approved Participant must be able to provide clients with full details of the execution of the transaction in a timely manner.~~

~~If an Approved Participant has a firm time stamped client order and accumulates futures in an inventory account for administrative purposes only, the transfer of the position to the client must be done over the counter (OTC). This procedure is required to ensure that the unwinding does not represent a change in beneficial interest (i.e. the client is the beneficial owner of the futures in the inventory account at all times). However, if an Approved Participant accumulates a position based on an indication of interest from the client, the transfer of the position to the client account must result in a transaction on the electronic trading system of the Bourse.~~

~~The date used on the client's confirmation shall be the date of the unwinding, provided that the client requested an average price. Approved Participants must, however, maintain records of each individual trade and of the transfer, which must be available to both the client and regulatory authorities on request.~~

6819 ~~Extraordinary Circumstances for shares futures contracts~~
(31.01.01, 22.01.16, 15.06.18)

~~In order to keep fair and orderly trading on the Bourse and for the protection of both share futures buyers and sellers, the Bourse may make special trading and settlement rules when an underlying interest is involved in:~~

- ~~a) a take-over bid under a circular;~~
- ~~b) a stock dividend, a share split or a consolidation;~~
- ~~c) any other unforeseen events.~~

~~Generally, no adjustments will be made for declared dividends, if any, on the underlying interest.~~

6820 Market Makers—Futures
(16.05.11, abr. 01.12.17)

6820.1 Daily Price Limits on Futures
(06.04.18)

For the purpose of this article:

- a) ~~“control price” means a price calculated for each futures based on the previous day settlement price.~~
- b) ~~“X limits” means price limits based on a percentage of the control price under and above which an order is not allowed to register in the central limit order book.~~
- c) ~~“Y limits” means price limits based on a percentage of the control price under and above which an incoming order would not be executed and would be eliminated, or under and above which a theoretical opening price would put the derivative instrument into a reserved state.~~
- d) ~~“reserved state” means a trading halt triggered by a theoretical opening price under or above the Y limits at the opening of a given instrument.~~

~~The Bourse may subject futures to the X limits and Y limits as follows:~~

- a) ~~X limits: any order entered by a participant in breach of the X limits is automatically rejected by the trading system and a message is automatically sent to the participant to confirm such order rejection.~~
- b) ~~Y limits~~
 - i) ~~At the opening of an instrument, a theoretical opening price under or above the calculated Y limits causes the derivative instrument to enter into a reserved state.~~
 - ii) ~~Participants can enter new orders and modify or cancel their orders on an instrument which is in reserved state.~~
 - iii) ~~When an instrument is in reserved state, the trading system will attempt to automatically re-open the trading of such instrument through a volatility auction. Should the resulting reopening price be within the Y limits, trading on the instrument will resume. Should the resulting reopening price be outside the Y limits, the instrument will be maintained in a reserved state and another volatility auction will take place. Such process will automatically take place until trading on the instrument resumes. The Bourse can extend the trading halt created by the reserved state to ensure orderly trading.~~
 - iv) ~~The Bourse will notify the market through its market data feed when an instrument enters into a reserved state and when trading is resumed for such instrument.~~
 - v) ~~During the continuous trading phase, passive orders priced outside the Y limits but within the X limits will be allowed in the trading system. Should the potential execution price of an incoming order be outside the Y limits, such incoming order will be eliminated, preventing the trade, and a message will be automatically sent to the participant to confirm such order elimination.~~
 - vi) ~~A limit order priced outside the Y limits that could otherwise be partially executed will be partially executed up until a lot is priced outside of the Y limits, and the remaining quantity of the order will be priced at the Y limit.~~

~~Control prices and percentages of the X limits and Y limits can be modified and Y limits can be temporarily lifted at the Bourse’s discretion to ensure regular trading.~~

~~The X limits are disseminated to the market via the Bourse's market data feed daily prior to the opening of the market.~~

~~The X limits do not apply to bulk quotes entered by approved participants or clients of approved participants while acting as duly appointed market makers pursuant to article 6395.~~

~~“escrow receipt” means:~~

- i) ~~in the case of an equity, exchange-traded fund or income trust unit, a document issued by a financial institution approved by the Canadian Derivatives Clearing Corporation certifying that a security is held and will be delivered upon exercise by such financial institution in respect of a specified option of a particular client of an Approved Participant; or~~

~~“firm account” means an account established by an Approved Participant, which is confined to positions carried by the Approved Participant on its own behalf;~~

~~“floating margin rate” means:~~

- i) ~~the last calculated regulatory margin interval, effective for the regular reset period or until a violation occurs, such rate to be reset on the regular reset date, to the calculated regulatory margin interval determined at that date; or~~
- ii) ~~where a violation has occurred, the last calculated regulatory margin interval determined at the date of the violation, effective for a minimum of twenty trading days, such rate to be reset at the close of the twentieth trading day, to the calculated regulatory margin interval determined at that date, where a reset results in a lower margin rate.~~

~~For the purpose of this definition, the term “regular reset date” is the date subsequent to the last reset date where the maximum number of trading days in the regular reset period has passed.~~

~~For the purpose of this definition, the term “regular reset period” is the normal period between margin rate resets. This period must be determined by the Canadian self-regulatory organizations with member regulation responsibilities and must not be no longer than sixty trading days.~~

~~For the purpose of this definition, the term “regulatory margin interval” means the margin interval calculated by the Bourse in collaboration with the Canadian Derivatives Clearing Corporation.~~

~~For the purpose of this definition, the term "violation" means the circumstance where the maximum 1 or 2 day percentage change in the daily closing prices is greater than the margin rate;~~

~~"index" means an equity index where:~~

- i) ~~the basket of equity securities underlying the index is comprised of eight or more securities;~~
- ii) ~~the weight of the single largest security position in the basket of equity securities underlying the index represents no more than 35% of the overall market value of the basket;~~
- iii) ~~the average market capitalization for each security position in the basket of equity securities underlying the index is at least \$50 million; and~~
- iv) ~~in the case of foreign equity indices, the index is both listed and traded on an exchange that meets the criteria for being considered a recognized exchange as set out in the definition of “regulated entities” included in the General Notes and Definitions of the “Joint Regulatory Financial Questionnaire and Report” form of the Investment Industry Regulatory Organization of Canada;~~

~~“OCC option” means a call option or a put option issued by The Options Clearing Corporation;~~

~~“tracking error margin rate” means the last calculated regulatory margin interval for the tracking error resulting from a particular offset strategy. The meaning of the term “regulatory margin interval” and the margin rate policy are the same as for the floating margin rate.~~

9002 Risk Margining Systems
(01.01.05, 30.11.15)

~~a) With respect to an approved participant account constituted exclusively of positions in derivative instruments listed on the Bourse, the margin required may be the one calculated by the Standard Portfolio Analysis (SPAN) methodology using the margin interval calculated and the assumptions used by the Canadian Derivatives Clearing Corporation.~~

~~If the approved participant selects the SPAN methodology, the margin requirements calculated under this methodology will supersede the provisions stipulated in the Rules.~~

~~b) With respect to a client account, it is prohibited to use SPAN methodology to determine margin requirements.~~

9003 Inter-Commodity Combinations
(01.01.05, 01.02.07)

9121 Exchange Traded Futures Contracts—General
(01.01.05, 23.01.06, 14.01.16)

- a) ~~The Bourse shall establish margin requirements applicable to futures contracts positions held by clients and no approved participant shall effect a futures contract transaction or carry an account for a client without proper and adequate margin, which must be obtained as promptly as possible and maintained in conformity with the provisions of this section;~~
- b) ~~positions of clients must be marked to market daily and the required margin must be determined by using the greatest of:~~
 - i) ~~the rate required by the futures contract exchange on which the contract is entered into or its clearing corporation; or~~
 - ii) ~~the rate required by the broker through which the approved participant ensures the clearing of the futures contract;~~
- e) ~~in the case of a futures contract exchange or its clearing corporation that prescribes margin requirements based on initial and maintenance rates, the initial margin must be required from the client at the time the contract is entered into and such margin must not be for an amount less than the prescribed initial rate. When subsequent adverse price movements in the value of the futures contract reduce the margin on deposit to an amount below the maintenance level, a further amount to restore the margin on deposit to the initial rate must be required. The approved participant may, in addition, require such further margin or deposit as it may consider necessary as a result of fluctuations in market prices;~~
- d) ~~margin requirements established by the Bourse may be made applicable to one or more rather than all approved participants or clients if deemed necessary by the Bourse;~~
- e) ~~for clients, the margin requirements will be satisfied by the deposit of cash, escrow receipts or securities for which the loan value equals or exceeds the margin required. In the case of an escrow receipt, the receipt must certify that government securities are held for futures contract positions of a named client. For the purposes of this receipt, the allowable government securities must mature within one year from the date of the deposit and the required margin covered by the receipt must not be greater than 90% of the par value of such securities held on deposit. All government securities which are an acceptable form of margin for the clearing corporation are acceptable;~~
- f) ~~every approved participant must require from each of its customers for whom trades are effected through an omnibus account, not less than the amount of margin that would be required from such customers if their trades were effected through fully disclosed accounts;~~
- g) ~~specific margin requirements may be applicable on spread positions when a client account holds such positions. Every approved participant must clearly identify such spread positions in its records relating to margin calculations;~~
- h) ~~from time to time, the Bourse may impose special margin requirements with respect to particular futures contracts or particular positions in futures contracts.~~

9122 ~~Simple or Spread Positions in Futures Contracts~~
~~(01.01.05)~~

a) ~~Shares futures contracts positions~~

~~i) For simple positions in share futures contracts held in a client's account, the margin required must be the sum of:~~

~~A) the floating margin rate of the underlying interest;~~

~~and~~

~~B) the greater of:~~

~~I) 10% of the floating margin rate of the underlying interest; and~~

~~II) where the floating margin rate of the underlying interest is:~~

~~a) less than 10%, 5%;~~

~~b) less than 20% but greater or equal to 10%, 4%; or~~

~~c) greater or equal to 20%, 3%;~~

~~multiplied by the daily settlement value of the futures contracts.~~

~~ii) For spread positions in share futures contracts held in a client's account, the margin requirements are determined by the Bourse in collaboration with the clearing corporation, from time to time.~~

b) ~~Index futures contracts positions~~

~~The margin requirements which must be applied on all positions in index futures contracts held in a client's account are determined by the Bourse, in collaboration with the clearing corporation, from time to time.~~

9123 ~~Share Futures Contracts and Security Combinations~~
~~(01.01.05, 14.01.16, 15.06.18)~~

a) ~~Share futures contracts—underlying interest combinations~~

~~Where a client account contains one of the following combinations:~~

~~•long share futures contract and short an equivalent position in the underlying interest; or~~

~~•short share futures contract and long an equivalent position in the underlying interest;~~

~~the minimum margin required must be the published tracking error margin rate for a spread between the futures contract and the related underlying interest, multiplied by the market value of the underlying interest.~~

b) ~~Short share futures contracts — long warrants, rights, instalment receipts combination~~

~~Where a client holds a short share futures contract on the underlying interests of an issuer and a long position in warrants, rights, shares, instalment receipts or other securities pursuant to the terms of which the holder is entitled to acquire the same class and at least the same number of underlying interests of the same issuer, the margin required must be equal to the difference between the market value of the long position and the settlement value of the short share futures contract, plus the aggregate of the subscription price or other cost or charge payable in connection with the acquisition of underlying interests to the relevant warrant, right, share, instalment receipt or other security.~~

e) ~~Short share futures contracts — long capital shares~~

~~For the purposes of this section:~~

- ~~a) "capital share" means a share issued by a split share company which represents all or a substantial portion of the capital appreciation portion of the underlying common share;~~
- ~~b) "capital share conversion loss" means any excess of the market value of the capital shares over the retraction value of the capital shares;~~
- ~~e) "preferred share" means a share issued by a split share company which represents all or a substantial portion of the dividend portion of the underlying common share, and includes equity dividend shares of split share companies;~~
- ~~d) "retraction value", for capital shares, means:
 - ~~i) where the capital shares can be tendered to the split share company for retraction directly for the underlying common shares, at the option of the holder, the excess of the market value of the underlying common shares received over the retraction cash payment to be made when retraction of the capital shares takes place;~~
 - ~~ii) where the capital shares cannot be tendered to the split share company for retraction directly for the underlying common shares, at the option of the holder, the retraction cash payment to be received when retraction of the capital shares takes place;~~~~
- ~~e) "split share company" means a corporation formed for the sole purpose of acquiring underlying common shares and issuing its own capital shares based on all or a substantial portion of the capital appreciation portion and its own preferred shares based on all or a substantial portion of the dividend income portion of such underlying common shares.~~

~~Where a client holds a long position in capital shares and a short share futures contract, the margin required is the sum of: the capital share conversion loss, if any; and the normal margin required in the case of client account positions on the equivalent number of preferred shares.~~

~~The market value of the underlying security to be used for the calculation of the required margin pursuant to the preceding paragraph is the settlement value of the share futures contract.~~

~~In no case the margin required may be less than 3% of the settlement value of the share futures contract.~~

9124 ~~Share Futures Contracts Combinations with Options~~

(01.01.05, 15.06.18)

- ~~i) A) the margin required on the futures contract; less~~
- ~~B) the aggregate market value of the call option;~~

~~and~~

- ~~ii) the published tracking error margin rate for a spread between the futures contract and the related underlying interest, multiplied by the market value of the underlying interest.~~

b) Short put options—short share futures contracts

- ~~i) A) the margin required on the futures contract; less~~
- ~~B) the aggregate market value of the put option;~~

~~and~~

~~I) the aggregate exercise value of the call option less the daily settlement value of the futures contract; or~~

~~II) the margin required on the futures contract;~~

~~B) *In-the-money or at-the-money position*~~

~~I) the aggregate market value of the call option; less~~

~~II) the aggregate in-the-money amount of the call option.~~

~~d) Long put options—long share futures contracts~~

~~Where a put option is carried long for a client's account and the account is also long a share futures contract on the same number of units of trading on the same underlying interest, the minimum margin required must be the greater of:~~

~~i) the published tracking error margin rate for a spread between the futures contract and the related underlying interest, multiplied by the market value of the underlying interest;~~

~~and~~

~~ii) A) *Out-of-the-money position*~~

~~The aggregate market value of the put option; plus the lesser of:~~

~~I) the daily settlement value of the futures contract less the aggregate exercise value of the put option; or~~

~~II) the margin required on the futures contract;~~

~~B) *In-the-money or at-the-money position*~~

~~I) the aggregate market value of the put option; less~~

~~II) the aggregate in-the-money amount of the put option.~~

~~e) Conversion or long tripo combination involving options and share futures contracts~~

~~Where a put option is carried long for a client's account and the account is also short a call option and long a share futures contract on the same number of units of trading on the same underlying interest with the same expiry date, the minimum margin required must be the greater of:~~

- a) ~~With respect to an account of an approved participant or market maker, the Bourse may establish certain charges against the capital of the approved participant carrying the account, which charges may be less onerous than margin requirements applicable to clients but for which the approved participant must maintain adequate capital resources at all times;~~
- b) ~~positions of approved participants and customers must be marked to market daily and the required capital must be determined by using the greatest of:~~
- i) ~~the rate required by the futures contract exchange on which the contract is entered into or its clearing corporation; or~~
- ii) ~~the rate required by the broker through which the approved participant ensures the clearing of the futures contract;~~
- c) ~~in the case of a futures contract exchange or its clearing corporation that prescribes margin requirements based on initial and maintenance rates, initial capital is required at the time the contract is entered into and the amount of such capital must not be less than the prescribed initial rate. Subsequently, the approved participant must maintain, for each position held, a capital amount equivalent to the prescribed maintenance rate;~~

- d) ~~capital requirements established by the Bourse may be made applicable to one or more rather than all approved participants if deemed necessary by the Bourse;~~
- e) ~~specific capital requirements may be applicable on spread positions when an approved participant account holds such positions. Every approved participant must clearly identify such spread positions in its records relating to margin calculations;~~

9222 ~~Simple or Spread Positions in Futures Contracts~~
(01.01.05, 23.11.16)

a) ~~Share futures contracts positions~~

- i) ~~For simple positions in share futures contracts held in an approved participant's account, the capital required must be equal to either the floating margin rate of the underlying interest multiplied by the daily settlement value of the futures contracts or the result of the methodology outlined under article 9122 a) i), at the Bourse's discretion;~~
- ii) ~~for spread positions in shares futures contracts held in an approved participant's account, the capital requirements are determined by the Bourse, in collaboration with the clearing corporation, from time to time.~~

b) ~~Index futures contracts positions~~

~~The capital requirements which must be applied on all positions in index futures contracts held in an approved participant's account are determined by the Bourse, in collaboration with the clearing corporation, from time to time.~~

9223 ~~Share Futures Contracts and Security Combinations~~
(01.01.05, 14.01.16, 15.06.18)

a) ~~Share futures contracts—underlying interest combinations~~

~~Where an approved participant account contains one of the following combinations:~~

- ~~long share futures contract and short an equivalent position in the underlying interest; or~~
- ~~short share futures contract and long an equivalent position in the underlying interest;~~

~~the minimum capital required must be the published tracking error margin rate for a spread between the futures contract and the related underlying interest, multiplied by the market value of the underlying interest.~~

b) ~~Short share futures contracts—long convertible security combination~~

~~Where an approved participant holds a short share futures contract on the underlying interests of an issuer and a long position in securities which are currently convertible or exchangeable into the same class and at least the same number of underlying interests of the same issuer, the capital required~~

~~must be the excess of the market value of the long position over the settlement value of the short share futures contracts.~~

~~Any residual net credit money balance between the market value and settlement value of the positions which are paired cannot be used to reduce capital otherwise required on the long or short position remaining unhedged after applying the pairing described above.~~

~~Where the securities representing the long position held by the approved participant are not convertible or exchangeable until the expiry of a specific period of time but the approved participant has entered into a written, legally enforceable agreement, pursuant to which it has borrowed securities of the same class as those of the short position which do not have to be returned until the expiration of the period of time until conversion or exchange, the above mentioned pairing may be done as if the securities representing the long position were currently convertible or exchangeable.~~

e) ~~Short share futures contracts—long warrants, rights, instalment receipts combination~~

~~Where an approved participant holds a short share futures contract on the underlying interests of an issuer and a long position in warrants, rights, shares, instalment receipts or other securities pursuant to the terms of which the holder is entitled to acquire the same class and at least the same number of underlying interests of the same issuer, the capital required must be equal to the aggregate of the subscription price or other cost or charge payable in connection with the acquisition of the underlying interests pursuant to the warrant, right, share, instalment receipt or other security plus (or minus, if the result is negative) the difference between the aggregate market value of the warrant, right, share, instalment receipt or other security and the settlement value of the share futures contracts.~~

~~d) Short share futures contracts—long capital shares~~

For the purpose of this section:

- a) ~~"capital share" means a share issued by a split share company which represents all or a substantial portion of the capital appreciation portion of the underlying common share;~~
- b) ~~"capital share conversion loss" means any excess of the market value of the capital shares over the retraction value of the capital shares;~~
- e) ~~"preferred share" means a share issued by a split share company which represents all or a substantial portion of the dividend portion of the underlying common share, and includes equity dividend shares of split share companies;~~
- e) ~~"retraction value", for capital shares, means:~~
 - i) ~~where the capital shares can be tendered to the split share company for retraction directly for the underlying common shares, at the option of the holder, the excess of the market value of the underlying common shares received over the retraction cash payment to be made when retraction of the capital shares takes place;~~
 - ii) ~~where the capital shares cannot be tendered to the split share company for retraction directly for the underlying common shares, at the option of the holder, the retraction cash payment to be received when retraction of the capital shares takes place;~~
- f) ~~"split share company" means a corporation formed for the sole purpose of acquiring underlying common shares and issuing its own capital shares based on all or a substantial portion of the capital appreciation portion and its own preferred shares based on all or a substantial portion of the dividend income portion of such underlying common shares.~~

~~Where an approved participant holds a long position in capital shares and a short share futures contract, the capital required is equal to the sum of the conversion loss, if any, and the normal capital required on the equivalent number of preferred shares.~~

~~The market value of the underlying security to be used for the calculation of the required capital pursuant to the preceding paragraph is the settlement value of the share futures contract.~~

~~In no case, the capital required shall be less than 3% of the settlement value of the share futures contract.~~

9224 ~~Share Futures Contracts Combinations with Options~~
~~(01.01.05, 15.06.18)~~

~~With respect to options and share futures contracts held in approved participants accounts, where the option contracts and the futures contracts have the same settlement date and underlying interest, or can~~

be settled in either of the two nearest contract months, the option contracts and the futures contracts may be offset as follows:

a) Short call options—long share futures contracts

~~Where a call option is carried short for an approved participant's account and the account is also long a share futures contract on the same number of units of trading on the same underlying interest, the minimum capital required must be the greater of:~~

- ~~i) A) the capital required on the futures contract; less~~
- ~~B) the aggregate market value of the call option;~~

~~and~~

- ~~ii) the published tracking error margin rate for a spread between the futures contract and the related underlying interest, multiplied by the market value of the underlying interest.~~

b) Short put options—short share futures contracts

~~Where a put option is carried short for an approved participant's account and the account is also short a share futures contract on the same number of units of trading on the same underlying interest, the minimum capital required must be the greater of:~~

- ~~i) A) the capital required on the futures contract; less~~

c) Long call options—short share futures contracts

~~Where a call option is carried long for an approved participant account and the account is also short a share futures contract on the same number of units of trading on the same underlying interest, the minimum capital required must be the greater of:~~

- ~~i) the published tracking error margin rate for a spread between the futures contract and the related underlying interest, multiplied by the market value of the underlying interest;~~

~~and~~

- ~~ii) A) *Out of the money position*~~

~~The aggregate market value of the call option; plus the lesser of:~~

- ~~I) the aggregate exercise value of the call option less the daily settlement value of the futures contract; or~~

- ~~II) the capital required on the futures contract;~~

~~B) *In-the-money or at-the-money position*~~

~~I) the aggregate market value of the call option; less~~

~~II) the aggregate in-the-money amount of the call option.~~

d) Long put options—long share futures contracts

~~Where a put option is carried long for an approved participant's account and the account is also long a share futures contract on the same number of units of trading on the same underlying interest, the minimum capital required must be the greater of:~~

~~i) the published tracking error margin rate for a spread between the futures contract and the related underlying interest, multiplied by the market value of the underlying interest;~~

~~and-~~

~~ii) A) *Out-of-the-money position*~~

~~The aggregate market value of the put option; plus the lesser of:~~

Appendix 6E-1 RULE

Article 6.412 of the Rules stipulates that, “The daily Settlement Price or the closing quotation are determined according to the procedures established by the Bourse for each Derivative Instrument.”

Appendix 6E-2 SUMMARY

(a) Futures Contracts And Options On Futures Contracts Daily Settlement Prices.

(i) These markets use the average price during the last minutes of trading or other calculation methods, as specified for each instrument in the following procedures, so as to establish a single Settlement Price. These calculations are executed manually by Market Supervisors or, as the case may be, by an automated algorithm using pre-established guidelines for each product.

(ii) The prices at which block trades, Exchange for Physical (EFP) or Exchange for Risk (EFR) are arranged shall not be used to establish the open, high, low or daily Settlement Price.

Appendix 6E-3 OBJECTIVES

The objectives of establishing daily Settlement Prices are to:

(a) Ensure a fair and orderly market close and pricing for Approved Participants so that they can properly mark-to-market their positions for Margin calculations and back office processing, including the clearing and settlement of their Transactions.

(b) Ensure that CDCC and all market participants are informed of the Settlement Prices.

Appendix 6E-4 DESCRIPTION

Appendix 6E4.1 THREE-MONTH CANADIAN BANKERS' ACCEPTANCE FUTURES CONTRACTS (BAX)

The daily Settlement Price procedure for the Three-Month Canadian Bankers' Acceptance Futures contract (BAX) is executed by a fully automated pricing algorithm which utilizes the parameters described in paragraphs (b), (c) and (d) of Appendix 6D-4.1 to ensure accuracy in the process.

- (a) Definitions:
- (i) “Regular order” means Orders routed by Approved Participants to the Bourse’s Trading System.
 - (ii) “Implied order” means orders generated by the implied pricing algorithm (using regular orders) and registered in the order book by the Electronic Trading System.
 - (iii) “Minimum Threshold” means the applicable threshold for BAX will be:
 - (1) 150 contracts for the first four quarterly contract months (“whites”);
 - (2) 100 contracts for quarterly contract months 5 to 8 (“reds”); and
 - (3) 50 contracts for quarterly contract months 9 to 12 (“greens”).
- (b) Identification of the Front Quarterly Contract Month. The automated daily settlement pricing algorithm identifies the front quarterly contract month from the first two quarterly contract months. The front quarterly contract month is the one, among the first two quarterly contract months, that has the largest Open Interest and the required market information. In the absence of both these criteria together, then the front quarterly contract month shall be determined by Market Supervisors based on available market information.
- (c) Algorithm Utilized for the Determination of the Daily Settlement Price of the Front Quarterly Contract Month.
- (i) Once the front quarterly contract month has been identified, the automated daily Settlement Price algorithm will determine the Settlement Price of the front quarterly contract month according to the following priorities: first, it will use the weighted average price of cumulated Trades that meet the Minimum Threshold, during the last three minute prior to 3:00 p.m., or prior to 1:00 p.m. on early closing days, on that contract month; if no such average price is available, it will then use the weighted average price of cumulated Trades for a total equal to the Minimum Threshold on that contract month for a period not exceeding the last 30 minutes prior to 3:00 p.m., or prior to 1:00 p.m. on early closing days. Trades resulting from both regular and implied orders will be used in the process. If no such average price is yet available, then the least variation between the bid or offer price that is not as a result of implied orders and the previous day Settlement Price will be used.
 - (ii) The Settlement Price must be within the bid/offer price of the individual contract provided that the bid or offer meets the Minimum Threshold of volumes required.

- (iii) All volumes and orders on a spread will be weighted at 50% relative to the orders and volumes on individual contracts, whereas a butterfly spread will be weighted at 25% relative to the orders and volumes on individual contracts.
 - (d) Procedure For The Determination Of The Daily Settlement Price Of The Remaining BAX Contract Months.
 - (i) Upon completion of the aforementioned steps, the automated daily pricing algorithm will then establish the Settlement Prices for all other BAX contract months sequentially. The daily Settlement Prices of all other BAX contract months will be based first on the last three minute outright market (resulting from regular and implied orders) prior to 3:00 p.m., or prior to 1:00 p.m. on early closing days, and strategy combination traded weighted average or, if no weighted average price can be determined in this manner, the least variation between the bid or offer for booked orders.
 - (ii) The Settlement Price must be within the bid/offer price of the individual contract provided that the bid or offer meets the Minimum Threshold of volumes required.
 - (iii) All volumes and orders on a spread will be weighted at 50% relative to the orders and volumes on individual contracts, whereas a butterfly spread will be weighted at 25% relative to the orders and volumes on individual contracts.
 - (e) Ancillary Procedure. In the absence of any required items to apply the aforementioned procedure, Market Supervisors will establish the Settlement Price based on available market information. They may also disregard any event (Trade, bid or offer) which occurs close to 3:00 p.m., or close to 1:00 p.m. on early closing days, and which is not compatible with a given Settlement Price. In this situation, Market Supervisors will keep a record of the criteria used to establish the Settlement Price.

Appendix 6E-4.2 FUTURES CONTRACTS ON S&P/TSX INDICES AND ON THE FTSE EMERGING MARKETS INDEX.

The Settlement Price shall be the weighted average of all Trades during the calculation period, which ranges from 3:59 p.m. to 4:00 p.m. for all contract months. In the case of mini Futures Contracts on S&P/TSX Indices, the Settlement Price shall be the same as the standard Futures Contracts on S&P/TSX Indices when such standard Futures Contracts exist.

- (a) Main Procedure.
 - (i) Booked orders. If there is an unfilled order with a higher bid or lower offer in an outright month, this bid or offer will override the Settlement Price obtained from the weighted average. The order must have been

posted for 20 seconds or longer prior to the close and its size must be for a total of 10 contracts or more.

(ii) Last Trades. If there are no Trades in the calculation period, then the last Trade before the calculation period will be taken into account while still respecting posted bids and offers in the market.

(b) First Ancillary Procedure. When two contract months and the spread are trading (quarterly calendar roll), the ancillary procedure of this section will apply.

(i) The front month must be settled first (the establishment of the front month is based on the month with the greatest Open Interest).

(ii) The spread between the two contract months must be settled next by taking into account the average trading price of the calculation period and by examining the Trades executed during the previous 10 minutes.

(iii) The Settlement Price for the back month or far month is obtained by the difference between the front month Settlement Price and the value of the spread.

(c) Second Ancillary Procedure. In the absence of the items required to apply the main procedure in paragraph (a) and the ancillary procedure in paragraph (b), the following ancillary procedure will apply.

(i) Market Supervisors will post a Settlement Price that will reflect the same differential that was applied on the previous day settlement. The Settlement Price will be adjusted accordingly to respect that contract's previous Settlement Price.

(d) Third Ancillary Procedure. In the absence of the items required to apply the main procedure in paragraph (a) and the ancillary procedures in paragraph (b) and in paragraph (c), the following ancillary procedure will apply. In this situation, Market Supervisors will establish the Settlement Price based on available market information. They may also disregard any event (Trade, bid or offer) which occurs near the end of the Trading Day and which is not compatible with a given Settlement Price. In this situation, Market Supervisors will keep a record of the criteria used to establish the Settlement Price

Appendix 6E-4.3 **GOVERNMENT OF CANADA BOND FUTURES CONTRACTS**

(a) Main Procedure. The Settlement Price shall be the weighted average of all Trades during the closing range. The closing range is defined as the last minute of trading prior to 3:00 p.m., or prior to 1:00 p.m. on early closing days, for all contract months.

*

(i) Booked orders. If there is an unfilled order with a higher bid or lower offer in an outright month, this bid or offer will override the Settlement

Price obtained from the weighted average. This order must have been posted for 20 seconds or longer prior to 3:00 p.m., or prior to 1:00 p.m. on early closing days, and its size must be for 10 contracts or more.

(ii) Last Trades. If there are no Trades in the last minute of trading, then the last Trade will be taken into account while still respecting posted bids and offers in the market.

(b) First Ancillary Procedure. When two contract months and the spread are trading (quarterly calendar roll), the following ancillary procedure will apply.

(i) The front month must be settled first (the establishment of the front month is based on the month with the greatest Open Interest).

(ii) The spread between the two contract months must be settled next by taking into account the last minute average trading price prior to 3:00 p.m., or prior to 1:00 p.m. on early closing days, and by examining the Trades executed during the previous 10 minutes.

(iii) The Settlement Price for the back month or far month is obtained by the difference between the front month Settlement Price and the value of the spread.

(c) Second Ancillary Procedure. In the absence of the items required to apply the main procedure in paragraph (a) and the ancillary procedure in paragraph (b), the following ancillary procedure will apply.

(i) Market Supervisors will post a Settlement Price that will reflect the same differential that was applied on the previous business day. The Settlement Price will be adjusted accordingly to respect that contract's previous Settlement Price.

(d) Third Ancillary Procedure. In the absence of the items required to apply the main procedure in paragraph (a) and the ancillary procedures in paragraph (b) and (c), the following ancillary procedure will apply.

(i) In this situation, Market Supervisors will establish the Settlement Price based on available market information. They may also disregard any event (Trade, bid or offer) which occurs close to 3:00 p.m., or close to 1:00 p.m. on early closing days, and which is not compatible with a given Settlement Price. In this situation, Market Supervisors will keep a record of the criteria used to establish the Settlement Price.

Appendix 6E-4.4 OPTIONS ON THREE-MONTH CANADIAN BANKERS' ACCEPTANCE FUTURES CONTRACTS

(a) Main Procedure.

(i) Weighted average. The Settlement Price shall be the weighted average of the prices traded in the closing range (last minute of trading prior to 3:00 p.m., or prior to 1:00 p.m. on early closing days). If there is, at the close, a higher bid or lower offer than the Settlement Price so obtained, that bid or offer shall be the Settlement Price.

(ii) Last Trades.

(1) If no Trade occurs during the closing range, the Market Supervisors will consider Transactions executed during the last 30 minutes of trading prior to 3:00 p.m., or prior to 1:00 p.m. on early closing days. Also, to be considered, the bids and offers shall be for a minimum of 25 contracts and shall have been posted at least one minute before 3:00 p.m., or before 1:00 p.m. on early closing days, to be considered.

(2) If no Trade occurs in the closing range (or in the last 30 minutes of trading prior to 3:00 p.m., or prior to 1:00 p.m. on early closing days), the Settlement Price shall be the theoretical price calculated by the Bourse (as described in paragraph (b)). If there is, at the close, a higher bid or lower offer than the Settlement Price so obtained, that bid or offer shall be the Settlement Price.

(b) Ancillary procedure. In the absence of the items required to apply the main procedure in paragraph (a), the following ancillary procedure will apply.

(i) The Settlement Price shall be determined by inserting the following parameters into a standard Option pricing model (Black & Scholes):

(1) Price of the Underlying. The Bourse will capture the Settlement Price of the underlying BAX Futures Contract. This will be the price of the underlying.

(2) Interest rate. The interest rate used will be the rate implied by the Settlement Price of the BAX Futures Contract nearest to expiration.

(3) Volatility. The Bourse will use the implied volatility (per contract month, for Puts and calls) obtained from the acting Market Maker. The same volatility will be applied for both Calls and Puts.

- (4) The strike price of the Options' series and the time to expiration are the other parameters that will be inserted into the model.
- (ii) In determining the closing price, the Bourse shall take into account the information provided by the posted strategy, for example: if the SEP 9200 straddle is 98 bid, the total of the closing prices of these two series should not be inferior to 98.

Appendix 6E-4.5 30-DAY OVERNIGHT REPO RATE FUTURES CONTRACTS (ONX)

- (a) Main Procedure. The Settlement Price shall be the weighted average of all Trades during the closing range. The closing range is defined as the last three minutes of trading prior to 3:00 p.m., or prior to 1:00 p.m. on early closing days, for all contract months.
 - (i) Weighted average of closing range Trades. The weighted average will be derived from Trades that occurred in the outright months during the closing range. The total volume traded in each outright month must be for 25 or more contracts.
 - (ii) Booked orders. If there is an unfilled order with a higher bid price or lower offer price in a month, this bid or offer will override the Settlement Price obtained from the weighted average. This order must have been posted for 15 seconds or longer prior to 3:00 p.m., or prior to 1:00 p.m. on early closing days, and its size must be for a total of 25 or more contracts in each of the months.
 - (iii) Remaining balances of booked orders partially executed at the close. In the case of a booked order as stipulated in sub-paragraph (a)(ii) above, which would be only partially executed, the Trades during the closing period as well as the remaining balance of booked orders will be considered to establish the Settlement Price.
 - (1) Example 1: If there is a booked order for 25 ONX contracts at 97.92 and 15 of those contracts are executed, the 10 remaining contracts, if they are still present on the market at the same price, will be considered to establish the required minimum of 25 contracts.
 - (2) Example 2: If there is a Trade of 15 ONX contracts during the closing period at 97.92 and there is a booked order bid for 10 ONX contracts at 97.91 (respecting the required time limit), the bid will be considered in addition to the Trades in the closing period to establish a Settlement Price.
 - (iv) Strips and spreads. All Trades and unfilled booked orders for strips and spreads related to any expiry months will be ignored.

- (b) First Ancillary Procedure. In the absence of the items required to apply the main procedure in paragraph (a), the following ancillary procedure will apply
- (i) Weighted average of Trades on strategies. The Settlement Price shall be the weighted average of the Trades on the strategies traded during the last five minutes of trading prior to 3:00 p.m., or prior to 1:00 p.m. on early closing days, provided the volume for the strategy taken into account was of 25 or more contracts.
 - (ii) Booked orders. If there is an unfilled order with a higher bid or lower offer, this bid or offer will override the settlement obtained from the weighted average described in sub-paragraph (a)(i). It has to have been posted for three minutes or longer prior to 3:00 p.m., or prior to 1:00 p.m. on early closing days, and the size must be for 25 or more contracts.
- (c) Second Ancillary Procedure. In the absence of the items required to apply the main procedure in paragraph (a) and the ancillary procedure in paragraph (b), the following ancillary procedure will apply.
- (i) Differential with the previous contract month's Settlement Price. The Settlement Price will be defined by a price that reflects an appropriate differential with the Settlement Price of the previous contract month always starting with the contract month closest to expiry.
 - (ii) Conflicts between spreads. If two spreads are in conflict, the calendar spread closest to expiry will have priority.
- (d) Third Ancillary Procedure. In the absence of the items required to apply the main procedure in paragraph (a) and the ancillary procedures in paragraph (b) and paragraph (c), the following ancillary procedure will apply. In this situation, Market Supervisors will establish the Settlement Price based on the available market information. They may also disregard any event (Trade, bid or offer) which occurs close to 3:00 p.m., or close to 1:00 p.m. on early closing days, and which is not compatible with a given Settlement Price. In this situation, Market Supervisors will keep a record of the criteria used to establish the Settlement Price.

Appendix 6E-4.6 OVERNIGHT INDEX SWAP FUTURES CONTRACTS (OIS)

- (i) Weighted average of closing range Trades. The weighted average will be derived from Trades that occurred in the outright months during the closing range. The total volume traded in each outright month must be for 25 or more contracts.

- (ii) Booked orders. If there is an unfilled order with a higher bid price or lower offer price in a month, this bid or offer will override the Settlement Price obtained from the weighted average. This order must have been posted for 15 seconds or longer prior to 3:00 p.m., or prior to 1:00 p.m. on early closing days, and its size must be for a total of 25 or more contracts in each of the months.
- (iii) Remaining balances of booked orders partially executed at the close. In the case of a booked order as stipulated in paragraph (a) above, which would be only partially executed, the Trades during the closing period as well as the remaining balance of booked orders will be considered to establish the Settlement Price.

 - (1) Example 1: If there is a booked order for 25 OIS contracts at 97.92 and 15 of those contracts are executed, the 10 remaining contracts, if they are still present on the market at the same price, will be considered to establish the required minimum of 25 contracts.
 - (2) Example 2: If there is a Trade of 15 OIS contracts during the closing period at 97.92 and there is a booked order bid for 10 OIS contracts at 97.91 (respecting the required time limit), the bid will be considered in addition to the Trades in the closing period to establish a Settlement Price.
- (iv) Strips and spreads. All Trades and unfilled booked orders for strips and spreads related to any expiry months will be ignored.
- (b) First Ancillary Procedure. In the absence of the items required to apply the main procedure in paragraph (a), the following ancillary procedure will apply:

 - (i) Weighted average of Trades on strategies. - (c) Second Ancillary Procedure. In the absence of the items required to apply the main procedure in paragraph (a) and the ancillary procedure in paragraph (b), the following ancillary procedure will apply.

- (i) Differential with the previous contract month's Settlement Price. The Settlement Price will be defined by a price that reflects an appropriate differential with the Settlement Price of the previous contract month always starting with the contract month closest to expiry.
- (ii) Conflicts between spreads. If two spreads are in conflict, the calendar spread closest to expiry will have priority.
- (d) Third Ancillary Procedure. In the absence of the items required to apply the main procedure in paragraph (a) and the ancillary procedures in paragraphs (b) and (c), the following ancillary procedure will apply. In this situation, Market Supervisors will establish the Settlement Price based on the available market information. They may also disregard any event (Trade, bid or offer) which occurs close to 3:00 p.m., or close to 1:00 p.m. on early closing days, and which is not compatible with a given Settlement Price. Chapter F—Reports

Article 6.500 Reports of Accumulated Positions

- (a) 1) Each Approved Participant must file daily with the Bourse, in the prescribed manner, a report detailing all gross positions held for its own account or for an account or group of accounts which are all owned by the same beneficial owner in ~~derivative instruments~~Derivative Instruments listed on the Bourse when these gross positions exceed the reporting thresholds prescribed by the Bourse for each of these ~~derivative instruments~~Derivative Instruments or a report confirming that there are no positions to be reported when none of the reporting thresholds prescribed by the Bourse have been exceeded for each of these ~~derivative instruments~~Derivative Instruments.
- (b) 2) Any report transmitted to the Bourse pursuant to this ~~article~~Article must be transmitted within the reporting hours prescribed by the Bourse and not later than 9:00 a.m. (ET) on the business day following the one for which positions must be reported.
- (c) 3) For each account subject to a positions report to the Bourse, each Approved Participant must provide to the Bourse all the information necessary to the Bourse to allow it to adequately identify and classify this account. The information that must be provided to the Bourse is the following:
- (i) a) the name and complete coordinates of the account beneficial owner;
 - (ii) b) the full account number as it appears in the Approved Participant records;
 - (iii) c) the account type (~~client, firm, market maker, professional or omnibus~~Client Account, Firm Account, Market Maker Account, Professional Account or Omnibus Account);
 - (iv) d) the beneficial account owner classification according to the typology established by the Bourse; and
 - (v) e) the identification of the nature of ~~transactions~~Transactions made by the account (speculation or hedging). If it is impossible to clearly determine if the account is used for speculative or hedging purposes, it must then, by default, be identified as being a speculative account.
- (d) 4) In addition to providing the above-mentioned information to the Bourse, each Approved Participant must provide, for each account being reported, a unique identifier complying with the following requirements:

- (i) a) for any account opened in the name of a natural ~~person~~Person or of a corporation or other type of commercial entity wholly-owned by this natural ~~person~~Person:
- (1) i) a unique identifier allowing to link together all the accounts having the same beneficial owner. The unique identifier used in such a case must be created by the Approved Participant in a format that it deems to be appropriate. This unique identifier, once created and used, must not be modified or replaced by a new identifier without having provided prior notice to the Bourse.
- (ii) b) for any account owned by ~~many~~man natural ~~persons~~Persons such as a joint account, an ~~investment~~Investment club account, ~~partnership or holding company~~Partnership or Holding Company:
- (1) i) if one of the natural ~~persons~~Persons owning this account has an ownership interest of more than 50% in the account, the unique identifier used must be the identifier of this ~~person~~Person and must be set as specified in subparagraph ~~3)-a)-i(c)(1)~~ above;
- ii) ~~if none of the persons owning the account has an ownership interest of more than 50 %, the unique identifier must be the account name.~~
- (iii) e) for any account opened in the name of a corporation other than a corporation wholly-owned by a natural ~~person~~Person:
- (1) i) if one of the natural ~~persons~~Persons owning shares of this corporation holds an ownership interest of more than 50 % in the account, the unique identifier used must be the identifier of this ~~person~~Person and must be set as specified in subparagraph ~~3(c)-a)(i)~~ above;
- (2) ii) if more than 50 % of the corporation shares are owned by another corporation, the unique identifier must be the ~~Legal Entity Identifier~~entity identifier of this other corporation as attributed by the organization responsible for the attribution of such an identifier;
- (3) iii) in all other cases, the unique identifier must be the ~~Legal Entity Identifier~~legal entity identifier of the corporation in whose name the account has been opened;
- (4) iv) if, for corporations mentioned in subparagraphs ~~e)-ii(d)(iii)(2)~~ and ~~e)-iii(3)~~, no ~~Legal Entity~~legal entity identifier is available, the identifier to be used shall be the incorporation number of the corporation as attributed by the government

authority having issued the incorporation certificate of such corporation.

(e) In the case where neither the ~~Legal Entity Identifier~~ legal entity identifier nor the incorporation number of a corporation are available or can be obtained or communicated by the Approved Participant in reason of legal or regulatory restrictions, the Approved Participant shall use a unique identifier that permits to link together all the accounts having the same corporation as beneficial owner. The unique identifier used in such a case can be either the name of the corporation owning the account or be created by the Approved Participant in a format that it deems appropriate.

(f) Any unique identifier, be it or not created by the Approved Participant, must not be changed or replaced by a new identifier without prior notice having been given to the Bourse.

(g) For the purposes of this ~~paragraph e~~ subparagraph (d)(iii), the term “~~Legal Entity~~ legal entity identifier” means the unique identification number attributed to a legal entity by any organization accredited to this effect pursuant to the ISO 17442 standard of the International Standardization Organization, as approved by the Financial Stability Board and the G-20 and aiming at implementing a universal and mandatory identification system for legal entities trading any type of ~~derivative instrument~~ Derivative Instrument.

(h) ~~5)~~ In order to determine if the reporting thresholds are attained, Approved Participants must aggregate positions held or controlled by the same account beneficial owner. For the purposes of this ~~article~~ Article, the term “control” means a beneficial ownership interest greater than 50 %.

(i) ~~6)~~ The reporting thresholds established by the Bourse are as follows:

- (l) 9) An Approved Participant may, with prior approval of the Bourse, delegate to a third party the transmission of position reports required under the provisions of paragraph ~~1(a)~~ (a) of ~~the present Rule~~ this Article. In order for such an exemption to be granted, the following conditions must be met:

- (c) Regulations and procedures prescribed by resolution of the directors of the Clearing Corporation which are not inconsistent with the Regulations of the Bourse shall be binding upon the Approved Participants of the Bourse to the same extent as such regulation and procedures and the breach of any such regulation shall have the same effect as a breach of the Regulations of the Bourse.

If the Approved Participant selects the SPAN methodology, the Margin requirements calculated under this methodology will supersede the provisions stipulated in the Rules.
- (b) Client Account. The use of SPAN methodology to determine Margin requirements with respect to a Client Account is prohibited.

Article 9.5 Inter-commodity Off-sets Prohibited

Unless otherwise specified, offsets are not permitted for positions in Client Accounts or Approved Participant Accounts involving Derivative Instruments based on two different Underlying Interests.

Chapter B—Margin

Article 9.100 Margin for Derivative Instruments

- (a) The ~~margin~~Margin requirements applicable to all positions in ~~derivative-instruments~~Derivative Instruments listed on the Bourse and held by an ~~approved-participant~~Approved Participant or on behalf of its clients are determined, from time to time by the Bourse, in collaboration with the ~~clearing-corporation~~Clearing Corporation.
- (b) Margin requirements established by the Bourse may be made applicable to one or more, rather than all ~~approved-participants~~, Approved Participants or clients if deemed necessary by the Bourse.
- (c) The following requirements shall apply with respect to Margin requirements:
- (i) ~~1) Every~~every client and non-client position must be marked to the market daily.;
- (ii) ~~2) Every approved-participant~~every Approved Participant must collect from its clients and non-clients for whom ~~trades-in-derivative-instruments~~Trades in Derivative Instruments are effected, a ~~margin~~Margin (which ~~margin~~Margin must be maintained) of not less than the minimum prescribed under the rules or regulations of the derivatives exchange on which the ~~derivative-instrument~~Derivative Instrument is traded (or its ~~clearing-corporation~~Clearing Corporation);
- (iii) ~~3) Every approved-participant~~Approved Participant must collect from each of its clients and non-clients for whom ~~trades~~Trades are effected through an ~~omnibus-account~~Omnibus Account the amount of ~~margin~~Margin that would be required from such clients and non-clients if their ~~trades~~Trades were effected through fully-disclosed accounts. and
- (iv) ~~4) The~~the Bourse may, in its discretion, require one or more or all ~~approved-participants~~Approved Participants to collect from one or more or all clients or non-clients for whom ~~trades-in-derivative-instruments~~Trades in Derivative Instruments are effected an amount of ~~margin~~Margin greater than the minimum prescribed under the rules or regulations of the derivatives exchange on which the ~~derivative-instrument~~Derivative Instrument is traded (or its ~~clearing-corporation~~Clearing Corporation). The Bourse may set such requirements with respect to any or all ~~derivative-instruments~~Derivative Instruments positions of a client or non-client.

- (v) **Note:** Many derivatives exchanges (especially in the United States) prescribe ~~margin~~Margin requirements based on initial and maintenance rates. In such cases, when a ~~derivative instrument~~Derivative Instrument position is entered into, the ~~approved participant~~Approved Participant must collect from the client an amount of ~~margin~~Margin not less than the prescribed initial ~~margin~~Margin rate. Subsequently, adverse price movements in the value of the ~~derivative instruments~~Derivative Instruments may reduce the client's ~~margin~~Margin on deposit to an amount below the maintenance ~~margin~~Margin level. When this happens the ~~approved participant~~Approved Participant must then collect from the client a further amount sufficient to restore the ~~margin~~Margin on deposit to the initial rate.

14202 ~~Orders in Undermargined Client Accounts~~
(24.04.84, 13.09.05)

~~Approved participants must not accept orders for new trades from a client unless the minimum amount of margin for the new trades is on deposit or is forthcoming within a reasonable time and unless the margin on that client's pre-existing open positions complies with the margin requirements established by the Bourse or is forthcoming within a reasonable time. Client credits in excess of margin requirements on all open positions may be allocated to the margin on a new commitment.~~

14203 Margin Calls

(24.04.84, 18.04.85, 13.09.05)

Article 9.102 Client Margins-Futures

(a) The Bourse shall establish Margin requirements applicable to Futures Contracts positions held by clients and no Approved Participant shall effect a Futures Contract Transaction or carry an account for a client without proper and adequate Margin, which must be obtained as promptly as possible and maintained in conformity with the following requirements:

- (i) positions of clients must be marked to market daily and the required Margin must be determined by using the greatest of:

- (1) the rate required by the Futures Contract exchange on which the contract is entered into or its Clearing Corporation; or
 - (2) the rate required by the broker through which the Approved Participant ensures the clearing of the Futures Contract;
- (ii) in the case of a Futures Contract exchange or its Clearing Corporation that prescribes Margin requirements based on initial and maintenance rates, the initial Margin must be required from the client at the time the contract is entered into and such Margin must not be for an amount less than the prescribed initial rate. When subsequent adverse price movements in the value of the Futures Contract reduce the Margin on deposit to an amount below the maintenance level, a further amount to restore the Margin on deposit to the initial rate must be required. The Approved Participant may, in addition, require such further Margin or deposit as it may consider necessary as a result of fluctuations in market prices;
- (iii) Margin requirements established by the Bourse may be made applicable to one or more rather than all Approved Participants or clients if deemed necessary by the Bourse;
- (iv) for clients, the Margin requirements will be satisfied by the deposit of cash, Escrow Receipts or Securities for which the loan value equals or exceeds the Margin required. In the case of an Escrow Receipt, the receipt must certify that government Securities are held for Futures Contract positions of a named client. For the purposes of this receipt, the allowable government Securities must mature within one year from the date of the deposit and the required Margin covered by the receipt must not be greater than 90% of the par value of such Securities held on deposit. All government Securities which are an acceptable form of Margin for the Clearing Corporation are acceptable;
- (v) every Approved Participant must require from each of its customers for whom Trades are effected through an Omnibus Account, not less than the amount of Margin that would be required from such customers if their Trades were effected through fully disclosed accounts;
- (vi) specific Margin requirements may be applicable on Spread Positions when a Client Account holds such positions. Every Approved Participant must clearly identify such Spread Positions in its records relating to Margin calculations; and
- (vii) from time to time, the Bourse may impose special Margin requirements with respect to particular Futures Contracts or particular positions in Futures Contracts.

Article 9.221 Capital for Futures

(a) With respect to an account of an Approved Participant or Market Maker, the Bourse may establish certain charges against the capital of the Approved Participant carrying the account, which charges may be less onerous than Margin requirements applicable to clients but for which the Approved Participant must maintain adequate capital resources at all times;

(b) positions of Approved Participants and customers must be marked to market daily and the required capital must be determined by using the greatest of:

(i) the rate required by the Futures Contract exchange on which the contract is entered into or its Clearing Corporation; or

(ii) the rate required by the broker through which the Approved Participant ensures the clearing of the Futures Contract;

(1) in the case of a Futures Contract exchange or its Clearing Corporation that prescribes Margin requirements based on initial and maintenance rates, initial capital is required at the time the contract is entered into and the amount of such capital must not be less than the prescribed initial rate. Subsequently, the Approved Participant must maintain, for each position held, a capital amount equivalent to the prescribed maintenance rate;

- (2) capital requirements established by the Bourse may be made applicable to one or more rather than all Approved Participants if deemed necessary by the Bourse;
- (3) specific capital requirements may be applicable on Spread Positions when an Approved Participant Account holds such positions. Every Approved Participant must clearly identify such Spread Positions in its records relating to Margin calculations; and
